[Material received between May 1911 and May 1912.]

The *International Catalogue of Scientific Literature* is in effect a continuation of the Royal Society's *Catalogue of Scientific Papers* which will, when completed, consist of an Author Catalogue and Subject Index covering the period of 1800-1900. Twelve quarto volumes of the Author Catalogue covering the period 1800-1883 have already been published; the volumes for 1884-1900 are in course of preparation. The Subject Index will be issued separately for each of the seventeen sciences dealt with in the *International Catalogue of Scientific Literature*, and will be arranged in accordance with its Schedules. The volumes for Pure Mathematics and Mechanics are published. The Subject Index for Physics is in preparation.

LONDON:

PRINTED FOR THE SOCIETY;

SOLD AT THEIR HOUSE IN REGENT'S PARK

M.DCCCXII

Papers and Memoirs intended for this work should be addressed to "THE EDITOR of the Zoological Record, Zoological Society, Regent's Park, London, N.W." It is earnestly requested that in the case of separately-printed copies of papers so forwarded, the *original pagination* may be indicated.

EXPLANATORY.

This Volume is printed in twenty Divisions, as enumerated on p. xii.

The pagination of each Division is separate, and is given at the left-hand top corner of the pages. The number and name of the Division is given as a heading on each left-hand page. The Registration Numbers are given at the right-hand top corner of the right-hand pages. The date 1911 corresponding to the bulk of the literature indexed is given at the right-hand top corner of the left-hand page.

In the Subject Index of each Division authors are quoted by name only. The full references will be found in the Title Section of the Division.

A List of Abbreviations of Titles of Journals is given at the end of the volume. This List includes not only journals actually indexed in this volume, but also journals that have been indexed in previous volumes. It should therefore be a fairly complete List of Journals that contain Zoological papers.

The Literature indexed is mainly that of 1911 but includes entries for 1901-1910 that have been received too late for inclusion in previous volumes of the International Catalogue.

The two title-pages show that Volume N (Zoology) of the Eleventh annual issue of the International Catalogue of Scientific Literature and Volume XLVIII of the Zoological Record are identical.

The proposal for an amalgamation of the Zoological Record with Volume N of the International Catalogue was approved by the International Convention which met in London in July, 1905. The agreement concluded with the Zoological Society of London provides that the amalgamation shall be for a period of five years, covering the literature of 1906-1910; at the end of this period each party to the agreement may resume the independent issue of its annual volumes, preserving the continuity of its series.

Subscribers to the Zoological Record will receive the volumes bound uniformly with previous volumes of the Record, while subscribers to the International Catalogue will receive their volumes in covers uniform with other volumes of the Catalogue.

The Schedules of Classification are bound up with the volumes intended for subscribers to the International Catalogue, but are absent from the volumes bound uniform with the Zoological Record.

The volume is arranged in accordance with these Schedules, but in one or two instances, notably in the case of Section XII Insecta, the Editor has adopted a modified arrangement.

CONTENTS.

- I. COMPREHENSIVE AND GENERAL ZOOLOGY.

(N) ZOOLOGY

(N) ZOOLOGY.

EXPLANATORY.

OWING to the great extent of Zoology, and the consequent specialisation that occurs amongst its workers, and because also of the desire that parts of the Zoological Catalogue shall be complete each one in itself, Zoology is divided into "Branches." These Branches, though primarily determined by the natural divisions of the animal kingdom, do not entirely correspond therewith, because of the great difference in the extent of the natural divisions. Some of these divisions (Phyla, or Classes) are consequently treated together, while others are divided into more than one Branch. When a division of this kind is adopted, there is also a Branch in which the divisions are still treated together as one whole, viz., Arthropoda, 2400-2431, and Vertebrata, 5200-5231. These two Branches will include only works of a wide scope. Thirty Branches are adopted, under the numbers 0400 to 6031, and there is also a comprehensive Branch numbered 0000-0231.

The subject matter of Zoology proper (as distinguished from the mode of arrangement of the animals alluded to above) is arranged under eight heads (or great Subjects). These eight Subjects all recur under each of the thirty Branches. Each Subject is indicated by a number, the terminal two digits of which are the same in every Branch. These great subjects will be found under 0207 to 0231.

Each great subject is divided into sub-divisions which are not numbered.

(N) ZOOLOGIE.

ERLÄUTERUNG.

BEI dem grossen Umfange der Zoologie und bei der hieraus sich ergebenden Specialisierung unter ihren Forschern, und ferner, weil der Wunsch besteht, dass einzelne Teile der zoologischen Bibliographie ein in sich geschlossenes Ganzes darstellen möchten, ist es als notwendig befunden, die Zoologie nach „Zweigen“ abzuteilen.

Diese Zweige sind zwar in erster Linie nach den natürlichen Gruppen des Tierreichs bestimmt, entsprechen ihnen aber doch nicht völlig, da der Umfang der einzelnen natürlichen Gruppen zu verschieden ist.

Demgemäss sind einzelne dieser Gruppen (Phyla oder Klassen) mit einander zusammengefasst, während andere in mehrere Zweige geteilt sind. In den Fällen, wo eine solche Teilung vorgenommen ist, giebt es auch einen Zweig, in dem die betreffende Gruppe ungeteilt als Ganzes behandelt wird, nämlich Arthropoden, 2400-2431 und Vertebraten, 5200-5231. Diese beiden Zweige sollen nur Werke allgemeinerer Art enthalten. Im ganzen sind unter Nummer 0400 bis 6031 dreissig Zweige angenommen und dazu kommt noch ein alles umfassender, unter Nummer 0000 bis 0231.

Der sonstige Stoff der Zoologie (im Unterschied von der Art der Anordnung der Tiere, von der bisher die Rede war) ist auf acht Kapitel (oder Hauptgegenstände) verteilt. Diese acht Gegenstände kehren bei jedem der dreissig Zweige wieder. Jeder Gegenstand ist durch eine Nummer bezeichnet, deren letzte beide Ziffern in allen Zweigen die gleichen sind.

Diese Hauptgegenstände findet man unter 0207 bis 0231.

Jeder Hauptgegenstand ist in Unterabteilungen geteilt, die nicht numeriert sind.

(N) ZOOLOGIE.

EXPLICATION.

ETANT donnée d'une part la grande extension de la Zoologie, qui force les adeptes de cette science à se spécialiser, et d'autre part la nécessité de rendre les diverses parties du Catalogue zoologique indépendantes les unes des autres, et aussi complètes que possible, on a jugé nécessaire de diviser la Zoologie en un certain nombre de "branches." Ces branches ont été établies autant que possible d'après les divisions naturelles du règne animal; toutefois elles ne correspondent pas toujours exactement à ces divisions, en raison des grandes différences qui existent dans l'étendue de celles-ci. Il en résulte que certaines divisions (phyla, ou embranchements) sont traitées ensemble, tandis que d'autres sont partagées en plusieurs branches. Dans ce dernier cas il y a ordinairement une branche qui traite l'ensemble d'un embranchement, par exemple, Arthropodes, 2400-2431, et Vertébrés, 5200-5231. Ces deux branches ne comprennent que des ouvrages traitant un sujet assez vaste. On a adopté trente branches, portant les indices 0400 à 6031. Il y a en outre une branche de généralités portant l'indice 0000-0231.

La Zoologie considérée en elle-même, indépendamment des subdivisions en groupes auxquelles il vient d'être fait allusion, est partagée en huit chapitres (ou grandes catégories de sujets). Ces huit catégories se répètent dans chacune des trente branches, et sont indiquées chacune par des nombres dont les deux derniers chiffres sont les mêmes dans toutes les branches. Elles se trouvent sous les indices 0207 à 0231. Chacune d'elles se partage en subdivisions qui ne portent pas d'indices spéciaux.

(N) ZOOLOGIA.

SPIEGAZIONI.

IN causa della grande estensione della zoologia, e della conseguente specializzazione che esiste tra i suoi cultori, e perchè è desiderabile che le parti del Catalogo zoologico siano complete ciascuna per sè stessa, si è trovato necessario dividere la zoologia in "rami." Questi rami, quantunque principalmente determinati dalle naturali divisioni del regno animale, non corrispondono interamente ad esse in causa della grande differenza nella estensione delle divisioni naturali. Alcune di queste divisioni (phyla, oppure classi) sono conseguentemente trattate insieme, mentre che altre sono divise in più di un ramo. Quando una divisione di questo genere è adottata, vi è anche un ramo nel quale le divisioni sono tuttavia trattate insieme come un complesso, p. es. Arthropoda, 2400-2431, e Vertebrata, 5200-5231. Questi due rami includeranno soltanto opere di largo soggetto. Trenta rami sono adottati, sotto i numeri 0400 a 6031, e inoltre è incluso un ramo complessivo col numero 0000-0231.

La materia della zoologia comprensiva (distinta da quella dei gruppi degli animali qui sopra accennati) è disposta sotto otto capitoli (o grandi soggetti). Questi otto soggetti tutti si ripetono in ognuno dei trenta rami. Ciascun soggetto è indicato da un numero, del quale le due ultime cifre sono le stesse in ciaschedun ramo. Questi grandi soggetti si trovano sotto i numeri da 0207 a 0231. Ciascun grande soggetto è diviso in sottodivisioni, che non sono numerate.

INSTRUCTIONS.

The registration numbers used in Zoology consist of four figures, of which the first two indicate the taxonomic position of the animal or animals dealt with and the last two the heading under which the paper is to be indexed.

Thus, in the registration number 2611 the figures 26 indicate *Crustacea*, while the figures 11 denote *Physiology*. All registration numbers beginning with 26 refer to *Crustacea*, and all registration numbers ending in 11 show that the paper indexed deals with a physiological subject.

The meaning to be assigned to the last two figures is always that given in the following list:—

- ..00 Title slip.
- ..03 Comprehensive and General Works.
(For sub-divisions *see* Hyperzoology p. 18.)
- ..07 Structure. (For sub-divisions *see* 0207.)
- ..11 Physiology. (For sub-divisions *see* 0211.)
- ..15 Development. (For sub-divisions *see* 0215.)
- ..19 Ethology. (For sub-divisions *see* 0219.)
- ..23 Variation and Aetiology. (For sub-divisions *see* 0223.)
- ..27 Geography. (For sub-divisions *see* (J) Geography.)

..31 Taxonomy.

The meaning of the first two figures is as follows:—

- 02.. General papers, or papers dealing with several classes of animals.
- 04.. Protozoa.
- 06.. Porifera (or Spongida).
- 08.. Coelenterata (or Cnidaria).
- 10.. Echinodermata.
- 12.. Platyhelminthes. Mesozoa and Trichoplax.
- 14.. Nemathelminthes.
- 16.. Chaetognatha. Rotifera. Gastrotricha. Kinorhyncha (or Echinodera).
- 18.. Archiannelida. Polychaeta. Myzostomaria. Oligochaeta. Gephyrea. Phoronis. Hirudinea.

INSTRUKTIONEN.

Die in der Zoologie gebrauchten Ordnungsnummern bestehen aus vier Ziffern, von denen die beiden ersten die taxonomische Stellung des oder der behandelten Tiere anzeigen, während die letzten die Art der Behandlung angeben. So bedeutet z. B. in der Ordnungsnummer 2611 die 26 *Crustacea*, die 11 aber *Physiologie*. Die mit 26 beginnenden Ordnungsnummern beziehen sich also auf *Crustacea*, und alle Ordnungsnummern auf 11 geben an, dass die katalogisierte Arbeit sich mit einem physiologischen Gegenstande befasst.

Die Bedeutung der letzten beiden Ziffern ergibt sich aus folgender Liste:—

Titel-Zettel.

- Umfassende und allgemeine Arbeiten. (Unterabteilungen *siehe* Hyperzoologie p. 18.)
- Morphologie. (Unterabteilungen *siehe* 0207.)
- Physiologie. (Unterabteilungen *siehe* 0211.)
- Entwicklung. (Unterabteilungen *siehe* 0215.)
- Ethologie. (Unterabteilungen *siehe* 0219.)
- Variation und Ätiologie. (Unterabteilungen *siehe* 0223.)
- Geographische Verbreitung. (Unterabteilungen *siehe* (J) Geographie.)

Taxonomie.

Die ersten beiden Ziffern bedeuten Folgendes:—

- Allgemeine, oder auf mehrere Tierklassen bezügliche Arbeiten.
- Protozoa.
- Porifera (oder Spongida).
- Coelenterata (oder Cnidaria).
- Echinodermata.
- Platyhelminthes. Mesozoa und Trichoplax.
- Nemathelminthes.
- Chaetognatha. Rotifera. Gastrotricha. Kinorhyncha (oder Echinodera).
- Archiannelida. Polychaeta. Myzostomaria. Oligochaeta. Gephyrea. Phoronis. Hirudinea.

INSTRUCTIONS.

(ISTRUZIONE).

Les numéros enregistreurs employés en zoologie comprennent quatre chiffres, dont les deux premiers indiquent la position taxonomique de l'animal ou des animaux en question, tandis que les deux derniers indiquent la rubrique sous laquelle le mémoire doit être classé.

Ainsi, dans le numéro enregistreur 2611 les chiffres 26 indiquent Crustacés, pendant que les chiffres 11 signifient Physiologie. Tout numéro enregistreur qui commence par 26 se rapporte aux Crustacés, de même que tout numéro enregistreur en 11 indique que le mémoire dont il est question s'occupe de physiologie.

La signification des deux derniers chiffres est toujours celle qui est donnée dans la liste suivante :—

I numeri di registrazione adoperati nella zoologia consistono di quattro cifre, delle quali le due prime indicano la posizione tassonomica dell'animale o degli animali di cui si tratta, mentre che le due ultime indicano la rubrica sotto la quale si ha da catalogare la memoria. Così, nel numero di registrazione 2611 le cifre 26 indicano *Crustacea*, mentre che le cifre 11 si riferiscono alla *Fisiologia*. Ogni numero di registrazione che comincia con 26 si riferisce ai Crustacea, e da ogni numero che termina in 11 si può inferire che la memoria catalogata si occupa di fisiologia.

Le due ultime cifre hanno invariabilmente la significazione che si vede nell'elenco seguente :—

- ..00 Fiche de titre.
- ..03 Ouvrages généraux ou d'une grande étendue. (Pour les subdivisions voy. Hyperzoologie p. 19.)
- ..07 Morphologie. (Pour les subdivisions voy. 0207.)
- ..11 Physiologie. (Pour les subdivisions voy. 0211.)
- ..15 Développement. (Pour les subdivisions voy. 0215.)
- ..19 Ethologie. (Pour les subdivisions voy. 0219.)
- ..23 Variation et étiologie. (Pour les subdivisions voy. 0223.)
- ..27 Distribution géographique. (Pour les subdivisions voy. (J) Géographie.)
- ..31 Taxonomie.
La signification des deux premiers chiffres est comme suit :—
- 02.. Mémoires généraux ou ayant trait à plusieurs classes d'animaux.
- 04.. Protozoaires.
- 06.. Porifères (ou Spongiaires).
- 08.. Cœlentérés (ou Cnidaria).
- 10.. Echinodermes.
- 12.. Platyhelminthes. Mésozoaires et le Trichoplax.
- 14.. Nématelminthes.
- 16.. Chætognathes. Rotifères. Gastrotriches. Kinorhynques (ou Echinodères).
- 18.. Archiannelides. Polychètes. Myzostomes. Oligochètes. Géphyriens. Phoronis. Hirudinéas.

- Scheda a titolo.
- Opere generali e comprensive. (Per le suddivisioni vedi Iperzoologia p. 19.)
- Struttura. (Per le suddivisioni vedi 0207.)

In addition to the complete volume it is intended to issue as three separate parts sections 12.. to 18.. (Vermidea); 28.. to 34..; and 35.. to 48.. (Hexapoda). Each of the remaining sections will then be published as a separate part.

Slips or Cards used in preparing the Volume.

Four kinds of slips are to be provided:—(1) Title slips, (2) Subject slips, (3) Systematic (Taxonomic) slips, (4) New Genera or Species slips. The several slips relating to the same paper should be tied together, and should have a common (arbitrary) number. This number must not be used for any other paper until two years have

Rédaction des Fiches.

Il doit y avoir quatre sortes de fiches, savoir:—(1) Fiches de titre, (2) Fiches de matière, (3) Fiches systématiques (taxonomiques), (4) Fiches pour les genres ou espèces nouvelles. Toutes les fiches qui se rapportent au même mémoire doivent être attachées ensemble et marquées d'un numéro en commun (arbitraire). Ce numéro ne

Redazione delle Schede.

Devono farsi quattro specie di schede:—(1) Scheda a titolo, (2) Scheda a materia, (3) Scheda sistematiche (tassonomiche), (4) Schede per i generi o le specie nuove. Tutte le schede riferentisi al medesimo lavoro devono essere attaccate insieme e segnate con un numero commune (arbitrario). Questo numero non è da usarsi

elapsed. The slips should be prepared as follows:—

(1) *Title slips*.—The first entry on a title slip is the letter N, followed by a four-figure registration number, in which the first two figures indicate the Branch of zoology as given in the above list, while the two last figures are .00. The remaining entries on the title slips are to be made as on the author slips for the other sciences.

At the foot of each title slip all the registration numbers corresponding to the subject and systematic slips prepared for the paper are to be given. If a paper is to be indexed under more than one Branch of zoology a separate title slip must be prepared for each Branch.

Example—

N 6000.

Mansion, Arthur. La taupe commune. Rev. sci., Paris, (sér. 4), **17**, 1902, (13–18). [6019 6031].

In order to economise space and to simplify entries, the full reference to a paper will be made only on the title and systematic slips. Each title slip will be printed in the Catalogue with a definite number attached. This number, together with the author's name, will be the reference to the paper in all other cases.

(2) *Subject Slips*.—The entries on the subject slips shall not, as a rule, be reproductions of the title, but such modifications thereof as shall serve to convey the necessary information in the clearest and most direct manner possible.

To prepare such slips properly it is essential that the papers shall have been read and indexed by those who are able to determine what are the several matters of importance to be brought under notice.

In the case of slips bearing the numbers 0000–0050, 0070 and 0090,

Jahren darf keine andere Arbeit mit derselben Nummer bezeichnet werden.

(1) *Titel-Zettel*.—Die erste Eintragung auf einem Titel-Zettel ist der Buchstabe N, worauf eine vierziffrige Ordnungsnummer folgt wovon die zwei ersten Ziffern den Zweig der Zoologie bezeichnen, wie in obiger Liste angegeben, während die zwei letzten Ziffern .00 sind. Die übrigen Eintragungen auf dem Titel-Zettel sind in derselben Weise abzufassen wie bei den Autoren-Zetteln in den anderen Wissenschaften.

Am Fusse eines jeden Titel-Zettels müssen sämtliche, den für die betreffende Arbeit hergestellten Sach- und System-Zetteln entsprechende, Ordnungsnummern angegeben werden. Soll ein Aufsatz unter mehr als einem Zweige der Zoologie katalogisiert werden, so ist für jeden Zweig ein besonderer Titel-Zettel herzustellen.

Beispiel—

N 6000.

Mansion, Arthur. La taupe commune. Rev. sci., Paris, (sér. 4), **17**, 1902, (13–18). [6019 6031].

Um Raum zu ersparen und die Eintragungen zu vereinfachen kommt das vollständige Citat nur auf die Titel- und System-Zettel. Jedem im Kataloge gedruckten Titel-Zettel wird eine bestimmte Nummer zugeteilt. Diese Nummer, mit dem Verfassernamen, bildet in allen anderen Fällen das Citat.

(2) *Sach-Zettel*. — Die Eintragungen auf den Sach-Zetteln sollen in der Regel keine Wiederholungen des Titels sein, sondern solche Modifikationen desselben, dass sie die erforderliche Auskunft so kurz und bündig wie möglich erteilen.

Für die richtige Fassung solcher Zettel ist es von Wichtigkeit, dass die Aufsätze von Personen gelesen und katalogisiert werden, welche im stande sind das Wichtige darin zu erkennen und hervorzuheben.

Bei Zetteln, welche die Nummern 0000–0050, 0070 und 0090 tragen,

doit être employé pour aucun autre mémoire qu'au bout de deux ans. Voici comment il faut rédiger les fiches :—

(1) *Fiches de titre*.—La fiche de titre doit commencer par la lettre N, suivie d'un numéro enregistreur de quatre chiffres, dont les deux premiers indiquent la branche de zoologie d'accord avec la liste ci-dessus, tandis que les deux dernières sont 00. Ensuite la fiche de titre sera établie de la même façon que les fiches d'auteur pour les autres sciences.

Chaque fiche de titre doit porter en bas tous les numéros enregistreurs qui correspondent aux fiches de matière et systématiques qui aient été rédigées pour le mémoire dont il s'agit. Si un mémoire doit être catalogué sous plus d'une branche de zoologie il faut une fiche séparée pour chaque branche.

Exemple—

N 6000.

Mansion, Arthur. La taupe commune. Rev. sci., Paris, (sér. 4), 17, 1902, (13-18). [6019 6031].

Pour gagner de la place et simplifier les articles, la référence ne sera donnée en entier que sur les fiches de titre et les fiches systématiques. Chaque fiche de titre sera imprimée dans le Catalogue et désignée par un numéro. Ce numéro, avec le nom d'auteur, servira de renvoi à l'article partout ailleurs.

(2) *Fiches de matière*.—Règle générale, la fiche de matière doit porter non pas une reproduction du titre mais de telles modifications du titre qui suffisent à donner les renseignements nécessaires de la manière la plus précise.

Afin que de telles fiches soient bien établies il est essentiel que les mémoires aient été lus et catalogués par des personnes à même de déterminer quelles sont les choses d'importance à faire ressortir. Là où il s'agit de fiches portant les numéros 0000-0050, 0070 et 0090, le

per nessun altro lavoro prima che siano scorsi due anni. Le schede devono essere redatte come segue :—

(1) *Schede a titolo*.—La scheda a titolo deve cominciare colla lettera N, seguita da un numero di registrazione di quattro cifre di cui le due prime indicano il ramo di zoologia d'accordo coll'elenco dissopra, mentre che le due ultime sono .00. Le altre annotazioni sulla scheda a titolo si fanno poi come sulle schede per autori nelle altre scienze.

La scheda a titolo deve portare in fondo tutti i numeri di registrazione corrispondenti colle schede sistematiche ed a materia che si siano preparate per il lavoro di cui si tratta. Se si vuol catalogare un lavoro sotto più d'un ramo di zoologia bisogna fare una scheda separata per ogni ramo.

Esempla—

N 6000.

Mansion, Arthur. La taupe commune. Rev. Sci., Paris, (sér. 4), 17, 1902, (13-18). [6019 6031].

Per risparmiare lo spazio e ridurre al più semplice le annotazioni, la riferenza non verrà scritta per esteso che sulle schede a titolo e le schede sistematiche. Ogni scheda a titolo si stamperà nel Catalogo con un numero definito. Questo numero, assieme al nome dell'autore, costituirà la riferenza al lavoro in ogni altro caso.

(2) *Schede a materia*.—Le annotazioni sulle schede a materia non saranno, di regola, ripetizioni del titolo, ma saranno tali modificazioni di questo che bastino a dare le informazioni necessarie nel modo più perspicuo che sia possibile.

Perchè tali schede siano ben redatte è essenziale che le memorie siano state lette e catalogate da persone che possano determinare quali sono le cose importanti da far risaltare.

Trattandosi di schede portanti i numeri 0000-0050, 0070 e 0090, il

the author's name should immediately follow the registration number.

Example—

N 0040.

Ross, R. Malaria and mosquitoes. London, Proc. R. Inst., **16**, 1901, (295–313).

This should be attached to the title slip and abbreviated thus:—

N 0040.

Ross, R. Malaria and mosquitoes. (295–313).

In cases in which it is desirable, for other purposes which the Bureaus may have in contemplation, to enter the full reference on the slip, the shortened reference will be made at the Central Bureau by striking out unnecessary particulars.

On slips bearing a number ending in ..27 (Geographical Distribution) the registration number should be immediately followed by the geographical symbol. After this should come (a) the author's name, (b) the title of the paper.

Example—

N 2227 *hc*.

Pilsbry, H. A. A new Colombian Pleurodonte [*P. clappi*]. Nautilus, Philadelphia, Pa., **15**, 1901, (34–35).

which, if the above directions are followed, will be reduced to—

N 2227 *hc*.

Pilsbry, H. A. A new Colombian Pleurodonte. (34–35).

The remaining registration numbers, viz., 0060, and those ending in ..03, ..07, ..11, ..15, ..19, and ..23, are divided into numerous sub-headings. One of these sub-headings should follow the registration number.

A separate card must be provided for each entry that is to appear separately in the Catalogue.

In cases in which entries cannot be included under existing subdivisions, and for which a new sub-

muss der Verfassersname unmittelbar auf die Ordnungsnummer folgen.

Beispiel—

N 0040.

Ross, R. Malaria and mosquitoes. London, Proc. R. Inst., **16**, 1901, (295–313).

Dieser Zettel müsste an den Titel-Zettel geheftet und wie folgt abgekürzt werden:—

N 0040.

Ross, R. Malaria and mosquitoes. (295–313.)

Falls es den Bureaus, zu irgend einem von ihnen beabsichtigten Zwecke, wünschenswert erscheint, das vollständige Citat beizubehalten, so wird das Centralbureau durch Streichen des Überflüssigen dasselbe abkürzen.

Bei Zetteln, welche eine Nummer auf ..27 tragen (geographische Verbreitung) muss das geographische Symbol unmittelbar auf die Ordnungsnummer folgen. Dann kommt (a) der Verfassersname, (b) der Titel des Aufsatzes.

Beispiel—

N 2227 *hc*.

Pilsbry, H. A. A new Colombian Pleurodonte [*P. clappi*]. Nautilus, Philadelphia, Pa., **15**, 1901, (34–35).

was, obiger Vorschrift gemäss, abgekürzt so lautet:—

N 2227 *hc*.

Pilsbry, H. A. A new Colombian Pleurodonte. (34–35).

Die übrigen Ordnungsnummern, namentlich 0060 und jene auf ..03, ..07, ..11, ..15, ..19 und ..23, sind in zahlreiche Unterabteilungen geteilt. Eine dieser Unterabteilungen muss auf die Ordnungsnummer folgen.

Jeder besonderen Eintragung im Kataloge muss ein besonderer Zettel entsprechen.

Falls die vorhandenen Unterabteilungen zur gehörigen Katalogisierung nicht hinreichen und

nom d'auteur doit suivre immédiatement le numéro enregistreur.

Exemple—

N 0040.

Ross, R. Malaria and mosquitoes. London, Proc. R. Inst., 16, 1901, (295-313).

Ceci doit être attaché à la fiche de titre et abrégé ainsi :—

N 0040.

Ross, R. Malaria and mosquitoes. (295-313).

Dans les cas où les bureaux régionaux, dans un but quelconque, désirent mettre la référence en entier sur la fiche, le Bureau Central en fera la référence abrégée en bifant les détails superflus.

Sur les fiches portant un numéro en ..27 (Distribution Géographique) le numéro enregistreur doit être suivi immédiatement du symbole géographique. Ensuite viendrait (a) le nom d'auteur, (b) le titre du mémoire.

Exemple—

N 2227 *he.*

Pilsbry, H. A. A new Colombian Pleurodonte [*P. clappi*]. Nautilus, Philadelphia, Pa., 15, 1901, (34-35).

Ce qui, conformément aux instructions ci-dessus, sera réduit à :—

N 2227 *he.*

Pilsbry, H. A. A new Colombian Pleurodonte. (34-35).

Les autres numéros enregistreurs, c.à.d. 0060 et ceux en ..03, ..07, ..11, ..15, ..19 et ..23, sont divisés en de nombreuses subdivisions. Une de ces subdivisions doit suivre le numéro enregistreur.

Il faut une fiche séparée pour chaque article qui doit paraître séparément dans le catalogue.

S'il se trouve que les subdivisions actuelles ne suffisent pas et qu'une nouvelle subdivision serait à désirer

nome dell'autore deve seguire immediatamente il numero di registrazione.

Esempio—

N 0040.

Ross, R. Malaria and mosquitoes. London, Proc. R. Inst., 16, 1901, (295-313).

Questo si deve attaccare alla scheda a titolo ed abbreviare così :—

N 0040.

Ross, R. Malaria and mosquitoes. (295-313).

Ove gli Uffici Regionali, a qualunque scopo, volessero annotare la riferenza sulla scheda per esteso, la riferenza abbreviata si farebbe dall'Ufficio Centrale col cancellare i dettagli soverchi.

Sulle schede portanti un numero in ..27 (Distribuzione Geografica) il numero di registrazione dev'essere seguito immediatamente dal simbolo geografico. Poi verrebbe (a) il nome dell'autore, (b) il titolo della memoria.

Esempio—

N 2227 *he.*

Pilsbry, H. A. A new Colombian Pleurodonte [*P. clappi*]. Nautilus, Philadelphia, Pa., 15, 1901, (34-35).

Giusto le suddette istruzioni questo si ridurrebbe a :—

N 2227 *he.*

Pilsbry, H. A. A new Colombian Pleurodonte. (34-35).

I rimanenti numeri di registrazione, cioè 0060 e quelli in ..03, ..07, ..11, ..15 e ..23 sono divisi in numerose suddivisioni. Una di queste suddivisioni deve seguire il numero di registrazione.

Ci vuol una scheda separata per ogni articolo che deve apparire separatamente nel Catalogo.

Nel caso di articoli che non si possono includere nelle suddivisioni attuali e per i quali si stima desidera-

division is thought to be desirable, such suggested new sub-division shall be recorded upon the card, in order that the matter may be dealt with by the Central Bureau. In no case must two differently numbered subjects be placed on one slip.

If the book or paper deals with so many of these sub-headings as to render it unnecessary to mention all of them, the word "general" should be used for the sub-heading. The sub-heading should be followed by (a) the author's name, (b) the title or modified title of the paper.

Example—

N 6015 [Regeneration].

Lange, C. Experiments on regeneration [of kidneys]. (Danish) Kjöbenhavn, Biol. Forh., 1899–1900, 1901, (1–8).

If this card is sent to the Central Bureau tied to the corresponding title slip, it should be abbreviated, as explained above, to—

N 6015 [Regeneration].

Lange, C. Experiments on regeneration [of kidneys]. (Danish) (1–8).

(3) *Systematic slips*.—In these slips the name of the animal or animals should immediately follow the registration number. Where more than one genus is mentioned a separate slip must be prepared for each genus.

Every new genus must have a separate slip; the name of the new genus must be followed by the indication "n. gen.," a brief statement as to what it is allied to and some indication of the species it includes, followed by the author's name and reference.

New sub-genera are to be treated in a similar manner to genera, except that "n. subgen." will be used, and the name of the genus of which it is a division will follow.

eine neue Unterabteilung deshalb wünschenswert erscheint, so ist die vorgeschlagene neue Unterabteilung auf dem Zettel anzugeben, damit das Central-Bureau entscheide, wie dabei zu verfahren sei. Auf keinen Fall dürfen zwei verschieden numerierte Gegenstände auf einen Zettel gesetzt werden.

Bezieht sich das Buch, resp. der Aufsatz, auf so viele Unterabteilungen, dass es unzweckmässig ist, sie alle anzuführen, so gebraucht man das Wort „Allgemeines“ für die Unterabteilung. Auf die Unterabteilung folgt (a) der Verfassername, (b) der Titel, resp. der modifizierte Titel der Arbeit.

Beispiel—

N 6015 [Regeneration].

Lange, C. Experiments on regeneration [of kidneys]. (Danish) Kjöbenhavn, Biol. Forh., 1899–1900, 1901, (1–8).

Wird dieser Zettel mit dem entsprechenden Titel-Zettel zusammengeheftet an das Central-Bureau geschickt, so ist er, wie oben erklärt, folgendermassen abzukürzen:—

N 6015 [Regeneration].

Lange, C. Experiments on regeneration [of kidneys]. (Danish) (1–8).

(3) *System-Zettel*.—Bei diesen Zetteln soll der Name des Tieres oder der Tiere unmittelbar auf die Ordnungsnummer folgen. Wird mehr als eine Gattung erwähnt, so ist für jede Gattung ein besonderer Zettel herzustellen. Jede neue Gattung muss einen besonderen Zettel erhalten; auf den Namen der neuen Gattung folgt die Bemerkung „n. gen.“, eine kurze Notiz, wem sie verwandt ist, und irgend eine Angabe über die Species, die sie umfasst; hierauf Verfassername und Citat.

Neue Untergattungen sind ähnlich zu behandeln, wie Gattungen, nur dass die Bemerkung „n. subgen.“ gebraucht und der Name der Gattung, um deren Unterabteilung es handelt, hinzugefügt wird.

la nouvelle subdivision que l'on propose doit être indiquée sur la fiche afin que le Bureau Central décide comment il faut procéder. En aucun cas deux articles portant des numéros différents ne doivent être écrits sur la même fiche.

Dans le cas où le livre ou mémoire traite de tant de ces subdivisions qu'il est inutile de les citer toutes, il faut employer le mot "Généralités" pour la subdivision. La subdivision doit être suivie (a) du nom d'auteur, (b) du titre ou du titre modifié du mémoire.

Exemple—

N 6015 [Regeneration].

Lange, C. Experiments on regeneration [of kidneys]. (Danish) Kjöbenhavn, Biol. Forh., 1899-1900, 1901, (1-8).

Si cette fiche est envoyée au Bureau Central attachée à la fiche de titre correspondante elle doit être abrégée, comme il est expliqué ci-dessus, à :—

N 6015 [Regeneration].

Lange, C. Experiments on regeneration [of kidneys]. (Danish) (1-8).

(3) *Fiches systématiques.*—Sur ces fiches le nom de l'animal ou des animaux doit suivre immédiatement le numéro enregistreur. Si mention est faite de plus d'un genre il faut une fiche distincte pour chaque genre.

Chaque genre nouveau doit avoir une fiche distincte ; le nom du genre nouveau doit être suivi de l'indication "n. gen.," puis d'une courte indication du genre ou des genres auxquels il est allié et de quelques indications relatives aux espèces qu'il renferme ; le tout sera suivi du nom d'auteur et de la référence.

Les sous-genres nouveaux seront traités de la même façon que les genres, mais l'indication "n. gen." sera remplacée par "n. subgen.," et l'on mettra ensuite le nom du genre auquel le sous-genre se rattache.

bile qualche nuova suddivisione, si deve annotare sulla scheda la nuova suddivisione proposta affinché l'Ufficio Centrale decida come si debba comportare con essa. In nessun caso si devono porre sulla stessa scheda due soggetti portanti numeri diversi.

Se il libro o la memoria si riferisce a tante di queste suddivisioni che non fa d'uopo accennarle tutte, allora si pone per la suddivisione la parola "generale." La suddivisione dev' essere seguita (a) dal nome dell'autore, (b) dal titolo, ossia dal titolo modificato, del lavoro.

Esempio—

N 6015 [Regeneration].

Lange, C. Experiments on regeneration [of kidneys]. (Danish) Kjöbenhavn, Biol. Forh., 1899-1900, 1901, (1-8).

Se questa scheda si manda all'Ufficio Centrale attaccata alla scheda a titolo corrispondente si deve abbreviare, come si è spiegato qui sopra, a :—

N 6015 [Regeneration].

Lange, C. Experiments on regeneration [of kidneys]. (Danish) (1-8).

(3) *Schede sistematiche.*—Su queste schede il nome dell'animale o degli animali deve seguire immediatamente il numero di registrazione. Se si fa menzione di più di un genere bisogna far una scheda separata per ogni genere.

Ciascun nuovo genere deve avere una scheda separata ; il nome del nuovo genere dev' essere seguito dalla indicazione "n. gen.," poi viene una breve indicazione di quello cui esso si connette, e qualche indicazione delle specie che include, e segue infine il nome dell'autore e le referenze.

I nuovi sottogeneri saranno trattati in modo simile ai nuovi generi, ma sarà adoperata la indicazione "n. subgen.," e seguirà il nome del genere del quale il sottogenere è divisione.

The author's name should follow the title or modified title on these slips.

Examples—

(I) N 2631.

Amblyops crozetii, bipolar occurrence. Ohlin, A. Ann. Mag. Nat. Hist., London, (Ser. 7), 7, 1901, (371-374).
[Schizopoda.]

(II) N 4431.

Heterophrya neximargo sp. n. Peru. Warren, W. Nov. Zool., Tring, 8, 1901, (457).
[Geometridae.]

When more than one new species is described from the same genus, all the new species should be mentioned on the slip and the respective page references given. Where only one new species is mentioned the slip should be arranged as in Example II. In any case the habitat should be given where possible.

At the end of each slip the name of the group of animals referred to should be given. When the work gives no indication of the group (i.e., Family, Sub-family or Tribe) and the slip-maker cannot from his own knowledge supply the deficiency the sign [?] may be written at the end of the slip.

When it is undesirable to index each genus separately a general entry should be given.

Example—

N 4431.

Hoyningen-Huene, F. von.
Aberrationen einiger estländischer Eulen und Spanner.
Berliner ent. Zs., 46, 1901,
(309-319, mit 1 Taf.).
[Noctuidae.]

On systematic slips Christian names should be represented by initials only.

Slips relating to fossil forms are to be marked †, and slips relating to fossil and recent forms †*. (The latter condition occurs only rarely in this division.)

Bei diesen Zetteln sollte der Verfassersname auf den Titel oder modifizierten Titel folgen.

Beispiele—

Heterophrya neximargo sp. n. Peru. Warren, W. Nov. Zool., Tring, 8, 1901, (457).
[Geometridae.]

Wird mehr als eine neue Art derselben Gattung beschrieben, so sollen sämtliche neue Arten, mit Angabe der betreffenden Seitenzahlen, auf dem Zettel erwähnt werden. Wo es sich bloß um eine neue Art handelt, ist der Zettel wie in Beispiel II herzustellen. Das Habitat ist auf jeden Fall wenn möglich anzugeben.

Am Ende eines jeden Systemzettels ist der Name der betreffenden Tiergruppe anzuführen. Enthält die Arbeit keine Angabe der Gruppe (d.h. Familie, Unterfamilie oder Tribus) und ist der Zettelschreiber nicht im stande, aus eigener Kenntniss die Lücke auszufüllen, so kann das Zeichen [?] an das Ende des Zettels gesetzt werden. Ist die gesonderte Angabe einer jeden Gattung nicht wünschenswert, so ist eine allgemeine Bezeichnung zu geben.

Beispiel—

N 4431

Hoyningen-Huene, F. von.
Aberrationen einiger estländischer Eulen und Spanner. Berliner ent. Zs., 46, 1901, (309-319, mit 1 Taf.).
[Noctuidae.]

Auf den System-Zetteln sollen die Vornamen nur durch Anfangsbuchstaben wiedergegeben werden.

Zettel, die sich auf fossile Formen beziehen, sind durch ein † zu bezeichnen; solche, die sich sowohl auf fossile als auf recente Formen beziehen, durch ein †*. (Der letzte Fall kommt in diesem Abschnitt nur selten vor.)

Le nom d'auteur doit *suivre* le titre ou le titre modifié sur ces fiches.

Exemples—

(I) N 2631.

Amblyops crozetii, bipolar occurrence. Ohlin, A. Ann. Mag. Nat. Hist., London, (Ser. 7), 7, 1901, (371-374).
[Schizopoda.]

(II) N 4431.

Heterophrya neximargo sp. n. Peru. Warren, W. Nov. Zool., Tring, 8, 1901, (457).
[Geometridae.]

Quand il y a description de plus d'une espèce du même genre, toutes les espèces nouvelles doivent être portées sur la fiche avec le renvoi aux pages respectives. S'il ne s'agit que d'une seule espèce nouvelle la fiche doit être établie conformément à exemple II. L'habitat doit être indiqué en tout cas si possible. L'on devra placer à la fin de chaque fiche systématique le nom du groupe d'animaux auquel la fiche se rapporte. Quand l'ouvrage ne fournit aucune indication de groupe (famille, sous-famille ou tribu) et lorsque le rédacteur de la fiche ne peut, d'après ses propres connaissances, suppléer à ce défaut d'indications, l'on pourra mettre le signe [?] à la fin de la fiche.

S'il n'est pas à désirer que chaque genre soit catalogué séparément il faut établir un article général.

Exemple—

N 4431.

Hoyningen-Huene, F. von. Aberrationen einiger estländischer Eulen und Spanner. Berliner ent. Zs., 46, 1901, (309-319, mit 1 Taf.).
[Noctuidae.]

Sur les fiches systématiques les noms de baptême doivent être représentés par des initiales seulement.

Les fiches relatives aux formes fossiles doivent être marquées †, et celles qui se rapportent aux formes fossiles récentes †*. (Cette dernière condition ne se présente que rarement dans cette division.)

Su queste schede il nome dell'autore deve venire *dopo* il titolo o titolo modificato.

Esempi—

(I) N 2631.

Amblyops crozetii, bipolar occurrence. Ohlin, A. Ann. Mag. Nat. Hist., London, (Ser. 7), 7, 1901, (371-374).

(II) N 4431.

Heterophrya neximargo sp. n. Peru. Warren, W. Nov. Zool., Tring, 8, 1901, (457).
[Geometridae.]

Quando si descrive più di una specie nuova del medesimo genere, tutte le specie nuove devono venire accennate sulla scheda colla riferenza alle pagine rispettive. Trattandosi di una sola specie nuova, la scheda dev' essere redatta come in esempio II. In ogni caso, per quanto sia possibile, si deve menzionare il habitat.

Al fine di ciascuna scheda sistematica si deve porre il nome del gruppo di animali cui la scheda si riferisce. Quando il lavoro non porta indicazione del gruppo (cioè famiglia, sottofamiglia, tribù) e il redattore della scheda non può di suo supplire alla deficienza, si può mettere al fine della scheda il segno [?].

Quando non si vuole catalogare separatamente ogni genere, si farà un' annotazione generale.

Esempio—

N 4431.

Hoyningen-Huene, F. von. Aberrationen einiger estländischer Eulen und Spanner. Berliner ent. Zs., 46, 1901, (309-319, mit 1 Taf.).
[Noctuidae.]

I nomi di battesimo devono essere rappresentati sulle schede sistematiche colle sole iniziali.

Le schede relative a forme estinte saranno segnate †, e le schede relative a forme estinte e viventi †*. (L'ultima condizione occorre soltanto raramente in questa divisione.)

(4) *Lists of New Genera and Species.*—For the preparation of these lists, the Regional Bureaus should give the names of genera and sub-genera (a) which are new, (b) the significance of which has been changed, (c) which contain new species. These may be written at the foot of the systematic slips, but it would greatly facilitate an earlier production of the volume if the Regional Bureaus would write each new genus on a separate card and attach it to the systematic slip.

Date of Receiving Slips.

The period during which the material for any one year will be received at the Central Bureau will not extend beyond June of the following year. Regional Bureaus are therefore earnestly requested to complete the indexing of their zoological literature within the time named.

The period covered by the literature indexed in any one of the annual volumes shall be from January 1st to December 31st of the particular year, but any matter which had not been received in time for insertion in the previous volume shall also be included therein.

Distinctive Character of cards.

The editorial work will be greatly facilitated by ruling a red line near the left-hand edge of the title slips, a green line near the left-hand edge of the subject slips, and no line at all on the taxonomy and new species slips. Or the slips may be printed on thin card of three colours, viz., red for the title slips, green for the subject slips, and white for the systematic slips. The size of the slips must be 16 cm. by 8 cm.

(4) *Listen neuer Gattungen und Arten.*—Zur Herstellung dieser Listen sollten die Regionalbureaus die Namen der Gattungen und Untergattungen angeben, (a) die neu sind, (b) deren Bedeutung sich geändert hat, (c) die neue Arten enthalten. Diese können am Fusse der System-Zettel angeführt werden, es würde jedoch zur schnelleren Erscheinung des Bandes wesentlich beitragen, wenn die Regionalbureaus jede neue Gattung auf einem besonderen Zettel schrieben und diesen an den System-Zettel hefteten.

Termin des Empfangs der Zettel.

Das Material für irgend ein Jahr darf nicht später als Ende Juni des folgenden Jahres in den Besitz des Centralbureaus gelangen. Die Regionalbureaus werden daher dringend ersucht, mit dem Katalogisieren ihrer zoologischen Literatur bis zu dem genannten Termin fertig zu werden.

Die in irgend einem der jährlichen Bände veröffentlichte Litteratur soll die Periode vom 1. Januar bis zum 31. December des betreffenden Jahres decken, etwaige Artikel aber, die für den vorigen Band zu spät eintrafen, werden darin mit aufgenommen.

Markierung der Zettel.

Die Herausgabe wird bedeutend erleichtert werden, wenn auf den Titel-Zetteln nahe dem linken Rande eine rothe Linie, auf den Sach-Zetteln entsprechend eine grüne Linie gezogen wird, während die Taxonomie- und Arten-Zettel ohne Linie bleiben. Man kann auch die Zettel auf drei verschiedenfarbige Sorten Carton drucken, nämlich die Titel-Zettel auf roten, die Sach-Zettel auf grünen und die System-Zettel auf weissen.

Die Zettel müssen 16 × 8 cm. gross sein.

(4) *Listes des genres et espèces nouvelles.*—Pour la rédaction de ces listes les Bureaux Régionaux doivent donner les noms des genres et sous-genres (a) qui sont nouveaux, (b) dont la signification est changée, (c) qui contiennent des espèces nouvelles. Ils peuvent être écrits au pied des fiches systématiques, pourtant si les Bureaux Régionaux voulaient écrire chaque genre nouveau sur une fiche séparée et l'attacher à la fiche systématique, cela contribuerait beaucoup à accélérer la publication du volume.

(4) *Elenchi di Generi e Specie nuove.*—Per la redazione di questi elenchi gli Uffici Regionali devono dare i nomi dei generi e sottogeneri, (a) che sono nuovi, (b) il cui significato si è cambiato, (c) che contengono delle specie nuove. Questi possono essere scritti in fondo alle schede sistematiche, ma contribuirebbe molto ad accelerare la pubblicazione del tomo se gli Uffici Regionali scrivessero ogni genere nuovo sopra una scheda separata e attaccassero questa alla scheda sistematica.

Date de la réception des fiches.

La période pendant laquelle les matières pour une année quelconque seront admises par le Bureau Central ne s'étendra pas au-delà du mois de juin de l'année suivante. Aussi les Bureaux Régionaux sont-ils instamment priés de compléter l'index de leur littérature zoologique avant l'expiration de ce terme.

La littérature indexée dans un volume annuel quelconque comprendra la période du 1^{er} janvier au 31 décembre de l'année en question, ainsi que les articles qui étaient arrivés trop tard pour être incorporés dans le volume précédent.

Caractère distinctif des fiches.

Le travail du Directeur sera grandement facilité si l'on trace une ligne rouge près du bord gauche des fiches de titre, une ligne verte près du bord gauche des fiches de matière, et si l'on ne trace aucune ligne sur les fiches systématiques et sur les fiches pour les espèces nouvelles. On peut aussi imprimer les fiches sur des cartons minces de trois couleurs, savoir, une carte rouge pour les fiches de titre, une carte verte pour les fiches de matière, et une carte blanche pour les fiches systématiques.

Les dimensions des fiches doivent être de 16 cm. sur 8 cm.

Data di ricezione delle schede.

Il periodo durante il quale il materiale per un anno qualunque sarà ammesso dall' Ufficio Centrale non si stenderà in là di Giugno dell'anno seguente. Gli Uffici Regionali sono perciò pregati con istanza di completare il catalogo della loro letteratura zoologica dentro del detto termine.

La letteratura catalogata in un tomo annuale qualunque comprenderà il periodo dal 1^o Gennaio al 31 Dicembre dell' anno di cui si tratta, coll' aggiunto di quegli articoli che fossero ricevuti troppo tardi per essere inclusi nel tomo precedente.

Carattere distintivo delle schede.

Il lavoro dell' Ufficio Centrale sarà grandemente facilitato dal segnare il margine sinistro delle schede a titolo con una linea rossa, quello delle schede a soggetto con una verde, e dal lasciare senza linea le schede tassonomiche e quelle per le specie nuove. Oppure le schede potranno essere scritte su carta di tre colori, rosso, verde, e bianco, il primo per le schede a titolo, il secondo per quelle a soggetto, il terzo per quelle sistematiche.

Il formato delle schede devlessere di 16 per 8 centimetri di lato.

0000-0231. Comprehensive Zoology.

N.B.—The subjects enumerated under numbers 0000 to 0231 may recur in any one of the subsequent Branches. In the Catalogue only works that deal with several Branches will be registered under numbers 0000 to 0231; hence the term "Comprehensive Zoology."

The principal divisions are :—

Lamellibranchiata (or Pelecypoda) (Order should be given); Scaphopoda; Amphineura.

Gastropoda includes Prosobranchiata (Rhipidoglossa, Ptenoglossa, Taenioglossa, Rachiglossa, Toxoglossa); Heteropoda; Opisthobranchiata (Tectibranchiata, Nudi-branchiata); Pteropoda; Pulmonata (Bassomatophora, Stylomatophora). Families of Prosobranchiata and Pulmonata should be mentioned. See Cambridge Natural History.

Cephalopoda includes Nautiloidea, Ammonoidea, Dibranchiata.

2400-2431 **Arthropoda.**

2431 will not include a systematic arrangement of genera and species.

Platyhelminthes. Mesozoa und Trichoplax.

Hauptabteilungen sind :—

Platyhelminthes (Turbellaria, Trematoda, Cestoda, Nemertinea); Mesozoa (Dicyemidae, Orthonec-
tidae); *Trichoplax*.

Nemathelminthes.

Hauptabteilungen sind :—

Nematoda; Nematomorpha (oder Gordiidae); Acanthocephala.

Chaetognatha. Rotifera. Gastrotricha. Kinorhyncha (oder Echinodera).

Archannelida. Polychaeta. Myzostomaria. Oligochaeta. Gephyrea. Phoronis. Hirudinea.

Brachiopoda. Bryozoa (oder Polyzoa).

Hauptabteilungen sind :—
Brachiopoda.

Bryozoa : Endoprocta; Ectoprocta (Gymnolaema: Cyclostomata, Trepustomata, Cryptostomata, Cheilostomata, Ctenostomata; Phylactolaema).

Mollusca.

Hauptabteilungen sind :—

Lamellibranchiata (oder Pelecypoda) (Ordnung angeben); Scaphopoda; Amphineura.

Gastropoda umfasst Prosobranchiata (Rhipidoglossa, Ptenoglossa, Taenioglossa, Rachiglossa, Toxoglossa; Heteropoda; Opisthobranchiata (Tectibranchiata, Nudi-branchiata); Pteropoda; Pulmonata (Bassomatophora, Stylomatophora). Familien der Prosobranchiata und Pulmonata angeben. Siehe Cambridge Natural History.

Cephalopoda umfasst Nautiloidea, Ammonoidea, Dibranchiata.

Arthropoda.

2431 wird eine systematische Anordnung der Gattungen und Arten nicht enthalten.

1200-1231 Platyhelminthes. Mésozoaires et le Trichoplax.

Voici les divisions principales :—
Platyhelminthes (Turbellariés, Trématodes, Cestodes, Némertiens); Mésozoaires (Dicyemidæ, Orthonectidæ); *Trichoplax*.

1400-1431 Némathelminthes.

Voici les divisions principales :—
Nématodes; Nématomorphes (ou Gordiens); Acanthocéphales.

1600-1631 Chætogonathes. Rotifères. Gastrotriches. Kinorhynques (ou Echinodères).

1800-1831 Archiannélides. Polychètes. Myzostomes. Oligochètes. Géphyriens. Phoronis. Hirudinées.

2000-2031 Brachiopodes. Bryozoaires (ou Polyzoaires).

Voici les divisions principales :—
Brachiopodes.
Bryozoa : Entoproctes; Ectoproctes (Gymnolèmes : Cyclostomes, Trepustomes, Cryptostomes, Cheilostomes, Cténostomes; Phylactolèmes).

2200-2231 Mollusques.

Voici les divisions principales :—
Lamellibranches (ou Pélécyopodes) (indiquer l'ordre); Scaphopodes; Amphineures.

Les Gastropodes comprennent les Prosobranches (Rhipidoglosses, Pténoglosses, Taenioglosses, Rachiglosses, Toxoglosses); Hétéropodes; Opisthobranches (Tectibranches, Nudibranches); Ptéropodes; Pulmonés (Basomatophores, Stylomatophores). Indiquer les familles des Prosobranches et des Pulmonés. *Voy. la Cambridge Natural History.*

Les Céphalopodes comprennent les Nautilés, Ammonites, Dibranches.

2400-2431 Arthropodes.

2431 ne comprendra pas un arrangement systématique des genres et des espèces.

Platyhelminthes. Mesozoa et Trichoplax.

Le divisioni principali sono :—
Platyhelminthes (Turbellaria, Trematoda, Cestoda, Nemertinea); Mesozoa (Dicyemidæ, Orthonectidæ); *Trichoplax*.

Nemathelminthes.

Le divisioni principali sono :—
Nematoda; Nematomorpha (vel Gordiidae); Acanthocephala.

Chætogonatha. Rotifera. Gastrotricha. Kinorhyncha (vel Echinodera).

Archiannelida. Polychæta. Myzostomaria. Oligochæta. Geophyrea. Phoronis. Hirudinea.

Brachiopoda. Bryozoa (vel Polyzoa).

Le divisioni principali sono :—
Brachiopoda.
Bryozoa : Entoprocta; Ectoprocta (Gymnolaema : Cyclostomata, Trepustomata, Cryptostomata, Cheilostomata, Cténostomata; Phylactolaema).

Mollusca.

Le divisioni principali sono :—
Lamellibranchiata (vel Pelecypoda) (indicare l'ordine); Scaphopoda; Amphineura.

Gastropoda includono Prosobranchiata (Rhipidoglossa, Ptenoglossa, Taenioglossa, Rachiglossa, Toxoglossa); Heteropoda; Opisthobranchiata (Tectibranchiata, Nudibranchiata); Pteropoda; Pulmonata (Basomatophora, Stylomatophora). Indicare le famiglie dei Prosobranchiata e Pulmonata. *Vedi Cambridge Natural History.*

Cephalopoda includono Nautiloidea, Ammonoidea, Dibranchiata.

Arthropoda.

2431 non deve includere la disposizione sistematica dei generi e delle specie.

2600-2631 **Crustacea.**

Entomostraca (= Cirripedia, Ostracoda, Copepoda, Phyllopoda).

Leptostraca.

Arthrostraca (or Edriophthalma) (= Amphipoda, Isopoda, Anisopoda).

[Malacostraca (= Thoracostraca + Arthrostraca).]

Thoracostraca (or Podophthalma) includes Decapoda, Schizopoda, Stomatopoda, Cumacea.

2800-2831 **Trilobita. Xiphosura. Eurypterida. Pantopoda. Tardigrada. Linguatulida.**3000-3031 **Arachnida.**

Arachnida consists of Scorpionida, Pedipalpi, Palpigradi, Araneida, Solifugae, Chernetida (or Pseudoscorpiones), Phalangida (or Opiliones), Acarida (or Acari).

3200-3231 **Prototracheata (or Onychophora).**

Prototracheata includes only *Peripatus* and its divisions.

3400-3431 **Myriopoda.**

Myriopoda consists of Chilopoda, Diplopoda (= Pselaphognatha and Chilognatha), Symphyla (or Scolopendrella), Pauropoda.

3500-3531 **Insecta.**

3531 will not include a systematic arrangement of genera and species.

3600-3631 **Aptera (or Apterygogenea). Anoplura. Mallophaga. Thysanoptera (or Physopoda). Siphonaptera (or Aphaniptera).**

Aptera, proper, consists of Thysanura and Collembola.

3800-3831 **Orthoptera. Neuroptera. Trichoptera.**

The principal divisions are:—

Orthoptera (Forficulidae or Dermaptera, Hemimeridae, Blattidae, Mantidae, Phasmodae, Gryllidae, Locustidae, Acridiidae).

Crustacea.

Entomostraca (= Cirripedia, Ostracoda, Copepoda, Phyllopoda).

Leptostraca.

Arthrostraca (oder Edriophthalma) (= Amphipoda, Isopoda, Anisopoda).

[Malacostraca (=Thoracostraca + Arthrostraca).]

Thoracostraca (oder Podophthalma) umfasst Decapoda, Schizopoda, Stomatopoda, Cumacea.

Trilobita. Xiphosura. Eurypterida. Pantopoda. Tardigrada. Linguatulida.**Arachnida.**

Arachnida umfasst Scorpionida, Pedipalpi, Palpigradi, Araneida, Solifugae, Chernetida (oder Pseudoscorpiones), Phalangida (oder Opiliones), Acarida (oder Acari).

Prototracheata (oder Onychophora).

Prototracheata umfasst nur *Peripatus* und dessen Abteilungen.

Myriopoda.

Myriopoda umfasst Chilopoda, Diplopoda (= Pselaphognatha und Chilognatha), Symphyla (oder Scolopendrella), Pauropoda.

Insecta.

3531 wird eine systematische Anordnung der Gattungen und Arten nicht enthalten.

Aptera (oder Apterygogenea). Anoplura. Mallophaga. Thysanoptera (oder Physopoda). Siphonaptera (oder Aphaniptera).

Aptera, im eigentlichen Sinne, umfasst Thysanura und Collembola.

Orthoptera. Neuroptera. Trichoptera.

Hauptabteilungen sind:—

Orthoptera (Forficulidae oder Dermaptera, Hemimeridae, Blattidae, Mantidae, Phasmodae, Gryllidae, Locustidae, Acridiidae).

2600-2631 Crustacés.

Entomostracés (= Cirripèdes, Ostracodes, Copépodes, Phyllopodes).

Leptostracés.

Arthrostracés (ou Edriophthalmes) (= Amphipodes, Isopodes, Anisopodes).

[Malacostracés (= Thoracostracés + Arthrostracés).]

Les Thoracostracés (ou Podophthalmes), comprennent les Décapodes, Schizopodes, Stomatopodes, Cumacés).

2800-2831 Trilobites. Xiphosures. Euryptérides. Pantopodes. Tardigrades. Linguatulides.**3000-3031 Arachnides.**

Les Arachnides comprennent les Scorpionides, Pédipalpes, Palpigrades, Aranéides, Solifuges, Chernetes (ou Pseudoscorpions), Phalangides (ou Opilions), Acariens.

3200-3231 Prototrachéates (ou Onychophores).

Les Prototrachéates comprennent seulement le genre *Peripatus* et ses divisions.

3400-3431 Myriapodes.

Les Myriapodes comprennent les Chilopodes, Diplopodes (Psélaphognathes et Chilognathes), Symphiliens (ou Scolopendrelles), Paupodes.

3500-3531 Insectes.

3531 ne comprendra pas un arrangement systématique des genres et des espèces.

3600-3631 Aptères (ou Aptérygogéniens). Anoploures. Mallophages. Thysanoptères (ou Physopodes). Siphonaptères (ou Aphaniptères).

Les Aptères proprement dits comprennent les Thysanoures et les Collembolés.

3800-3831 Orthoptères. Névroptères. Trichoptères.

Voici les divisions principales :—

Orthoptères (Forficulides ou Dermaptères, Hémiptères, Blattides, Mantides, Phasmides, Gryllides, Locustides, Acridides).

Crustacea.

Entomostraca (= Cirripedia, Ostracoda, Copepoda, Phyllopoda).

Leptostraca.

Arthrostraca (vel Edriophthalma) (= Amphipoda, Isopoda, Anisopoda).

[Malacostraca (= Thoracostraca + Arthrostraca).]

Thoracostraca (vel Podophthalma) includono Decapoda, Schizopoda, Stomatopoda, Cumacea.

Trilobita. Xiphosura. Eurypterida. Pantopoda. Tardigrada. Linguatulida.**Arachnida.**

Arachnida includono Scorpionida, Pedipalpi, Palpigradi, Araneida, Solifugæ, Chernetida (vel Pseudoscorpiones), Phalangida (vel Opiliones), Acarida (vel Acari).

Prototracheata (vel Onychophora).

Nei Prototracheata è incluso il solo *Peripatus* e le sue divisioni.

Myriopoda.

Chilopoda, Diplopoda (= Pselaphognatha e Chilognatha), Symphyla (vel Scolopendrella), Pauropoda.

Insecta.

3531 non deve includere la disposizione sistematica dei generi e delle specie.

Aptera (vel Apterygogenea). Anoplura. Mallophaga. Thysanoptera (vel Physopoda). Siphonaptera (vel Aphaniptera).

Gli Aptera propriamente detti consistono nei Thysanura e Collembola.

Orthoptera. Neuroptera. Trichoptera.

Le divisioni principali sono :—

Orthoptera (Forficulidæ vel Dermaptera, Hemimeridæ, Blattidæ, Mantidæ, Phasmidæ, Gryllidæ, Locustidæ, Acrididæ).

Neuroptera (Planipennia, Embiidae, Termitidae, Psocidae, Perlidae, Ephemeridae, Odonata).

Each slip relating to Neuroptera should also state to which of these divisions it refers.

Most of the Palaeozoic Insects are to be dealt with in this branch.

Neuroptera (Planipennia, Embiidae, Termitidae, Psocidae, Perlidae, Ephemeridae, Odonata).

Jeder Zettel für Neuroptera soll auch angeben, auf welche dieser Abteilungen er sich bezieht.

Die meisten der paläozoischen Insekten werden bei diesem Zweige zu behandeln sein.

4000-4031 **Hemiptera** (or **Rhynchota**) excl. Anoplura, which are placed in 3600.

The principal divisions are :—

Hemiptera Heteroptera and Hemiptera Homoptera. [Phytophthires (Aphidae, Psyllidae, Aleurodidae, Coccidae) are included in Hemiptera Homoptera.]

Families to be mentioned in all cases.

See Cambridge Natural History.

Hemiptera (oder **Rhynchota**), excl. Anoplura, welche unter 3600 eingeordnet sind.

Hauptabteilungen sind :—

Hemiptera Heteroptera und Hemiptera Homoptera. [Phytophthires (Aphidae, Psyllidae, Aleurodidae, Coccidae) sind in Hemiptera Homoptera enthalten.]

Familien immer angeben. *Siehe* Cambridge Natural History.

4200-4231 **Diptera** (excl. Siphonaptera, which are placed in 3600-3631).

The slips should be marked with the name of the family of Diptera.
See Cambridge Natural History.

Diptera (excl. Siphonaptera, welche unter 3600-3631 eingeordnet sind).

Bei den Diptera sind auf den Zetteln die Namen der Familien zu vermerken. *Siehe* Cambridge Natural History.

4400-4431 **Lepidoptera**.

The principal divisions are :—

Rhopalocera ; Heterocera.

The family to be mentioned in all cases. *See* Cambridge Natural History.

Lepidoptera.

Hauptabteilungen sind :—

Rhopalocera ; Heterocera.

Familien immer angeben. *Siehe* Cambridge Natural History.

4600-4631 **Hymenoptera**.

The principal divisions are :—

Aculeata = Anthophila (Apidae Andrenidae), Vespidae (Diploptera), Sphegidae s.l. (Fossoria). Formicidae (Heterogyna). Tubulifera = Chrysididae. Parasitica = Trigonulidae, Proctotrupidae, Pelecinidae, Chalcididae, Ichneumonidae, Braconidae, Megalyridae, Evanidae, Stephanidae, Cynipidae. Sessiliventre (or Chalastogastra) = Cephidae, Siricidae, Oryssidae, Tenthredinidae

Hymenoptera.

Hauptabteilungen sind :—

Aculeata = Anthophila (Apidae Andrenidae), Vespidae (Diploptera), Sphegidae s.l. (Fossoria). Formicidae (Heterogyna). Tubulifera = Chrysididae. Parasitica = Trigonulidae, Proctotrupidae, Pelecinidae, Chalcididae, Ichneumonidae, Braconidae, Megalyridae, Evanidae, Stephanidae, Cynipidae. Sessiliventre (oder Chalastogastra) = Cephidae, Siricidae, Oryssidae, Tenthredinidae.

Névroptères (Planipennes, Embiides, Termitides, Psocides, Perlides, Ephémérides, Odonates).

Chaque fiche relative aux Névroptères doit aussi indiquer à laquelle de ces divisions elle se rapporte.

La plupart des Insectes paléozoïques devront être traités dans cette branche.

4000-4031 **Hémiptères** (ou Rhynchotes) à l'exclusion des Anoploures, qui sont placés sous le numéro 3600.

Voici les divisions principales :—

Hémiptères Hétéroptères et Hémiptères Homoptères. [Les Phytophthires (Aphides, Psyllides, Aleurodides, Coccides) sont compris dans les Hémiptères Homoptères.]

Indiquer les familles en tout cas.

Voy. Cambridge Natural History.

4200-4231 **Diptères** (sauf les Siphonaptères, qui sont placés sous les numéros 3600-3631).

Les fiches doivent porter le nom de la famille des Diptères. Voy. Cambridge Natural History.

4400-4431 **Lépidoptères**.

Voici les divisions principales :—
Rhopalocères ; Hétérocères.

Indiquer la famille en tout cas.
Voy. Cambridge Natural History.

4600-4631 **Hyménoptères**.

Voici les divisions principales :—

Aculeata (ou Porte-aiguillons) = Antophiles (Apides, Andréinides), Vespides (Diploptères) Sphégides s.l. (Fouisseurs) Formicides (Hétérogynes). Tubulifères = Chrysidides. Parasites = Trigonalides, Proctotrupides, Pélécinides, Chalcidides, Ichneumonides, Braconides, Mégalyrides, Evaniides, Stéphanides, Cynipides. Sessiliventre (ou Chalastogastres) = Céphides, Siricides, Oryssides, Tenthredinides.

Neuroptera (Planipennia, Embiidae, Termitidae, Psocidae, Perlidae, Ephemeridae, Odonata.)

Ciascuna scheda relativa ai Neuroptera deve stabilire a quale di queste divisioni del gruppo si riferisce.

La maggior parte degli insetti paleozoici riferiscansi a questo ramo.

Hemiptera (vel Rhynchota), esclusi Anoplura, che sono indicati col numero 3600.

Le divisioni principali sono :—

Hemiptera Heteroptera e Hemiptera Homoptera. [Phytophthires (Aphidae, Psyllidae, Aleurodidae, Coccidae) sono inclusi in Hemiptera Homoptera.]

Indicare le famiglie in ogni caso.
Vedi Cambridge Natural History.

Diptera (esclusi Siphonaptera, che sono indicati dai numeri 3600-3631).

Le schede dovranno portare il nome della famiglia dei Diptera cui si riferiscono. Vedi Cambridge Natural History.

Lepidoptera.

Le divisioni principali sono :—
Rhopalocera ; Heterocera.

Indicare la famiglia in ogni caso.
Vedi Cambridge Natural History.

Hymenoptera.

Le divisioni principali sono :—

Aculeata = Anthophila (Apidae, Andrenidae), Vespidae (Diploptera), Sphegidae s.l. (Fossoria). Formicidae (Heterogyna. Tubulifera = Chrysididae. Parasitica = Trigonalidae, Proctotrupidae, Pelecinidae, Chalcididae, Ichneumonidae, Braconidae, Megalyridae, Evaniidae, Stephanidae, Cynipidae. Sessiliventre (vel Chalastogastrea) = Cephide, Siricide, Orysside, Tenthredinidae.

4800-4831 **Coleoptera (incl. Strepsiptera).**

The name of the family referred to should be given on each slip.

The families are numerous. They are included in the Munich Catalogue of the Coleoptera (Catalogus coleopterorum hucusque descriptorum synonymicus et systematicus) and (the subsequent additions) in "Cambridge Natural History," vol. vi.

5000-5031 **Prochordata, viz., Leptocardii, Enteropneusta, Tunicata.**5200-5231 **Vertebrata.**

No systematic enumeration is to be placed under 5231.

5400-5431 **Pisces [excl. Leptocardii (or Amphioxus), for which see 5000-5031].**

The principal divisions are :—

Cyclostomi, Ostracodermi, Plagiostomi, Holocephali, Arthrodira, Dipnoi, Teleostomi (or Teleostei and Ganoidei, with the exception of Arthrodira and Ostracodermi).

The family should be mentioned. See Cambridge Natural History.

5600-5631 **Amphibia and Reptilia.**

The principal divisions are :—

Batrachia or Amphibia (Stegocephala or Labyrinthodontia, Apoda, Caudata or Urodela, Ecaudata or Anura).

Reptilia (Anomodontia, Rhynchocephalia, Plesiosauria, Ichthyosauria, Cotylosauria, Pareiasauria, Diaptosauria, Protorosauria, Rhynchosauria, Procolophonia, Proganosauria, Choristodera, Chelonia, Crocodilia, Dinosauria, Ornithosauria or Pterosauria, Ophidia, Pythonomorpha, Rhiptoglossa, Lacertilia).

Coleoptera (incl. Strepsiptera).

Auf jedem Zettel ist der Name der betr. Familie anzugeben.

Die Zahl der Familien ist gross. Sie sind aufgeführt in dem Münchener Coleopteren-Katalog (Catalogus coleopterorum hucusque descriptorum synonymicus et systematicus) und (soweit es sich um spätere Zusätze handelt) in „Cambridge Natural History," vol. vi.

Prochordata, d.h., Leptocardii, Enteropneusta, Tunicata.**Vertebrata.**

5231 wird keine systematische Aufzählung enthalten.

Pisces [mit Ausschluss der Leptocardii (oder Amphioxus), siehe 5003-5031].

Hauptabteilungen sind :—

Cyclostomi, Ostracodermi, Plagiostomi, Holocephali, Arthrodira, Dipnoi, Teleostomi (oder Teleostei und Ganoidei, mit Ausnahme von Arthrodira und Ostracodermi).

Familie angeben. Siehe Cambridge Natural History.

Amphibia und Reptilia.

Hauptabteilungen sind :—

Batrachia oder Amphibia (Stegocephala oder Labyrinthodontia, Apoda, Caudata oder Urodela, Ecaudata oder Anura).

Reptilia (Anomodontia, Rhynchocephalia, Plesiosauria, Ichthyosauria, Cotylosauria, Pareiasauria, Diaptosauria, Protorosauria, Rhynchosauria, Procolophonia, Proganosauria, Choristodera, Chelonia, Crocodilia, Dinosauria, Ornithosauria oder Pterosauria, Ophidia, Pythonomorpha, Rhiptoglossa, Lacterilia).

4800-4831 Coléoptères (y compris les Strepsiptères).

Le nom de la famille dont il est question doit être donné sur chaque fiche.

Les familles sont nombreuses. Elles sont indiquées dans le Catalogue des Coléoptères de Munich (Catalogus coleopterorum hucusque descriptorum synonymicus et systematicus) et (pour les additions subséquentes) dans "Cambridge Natural History," vol. vi.

5000-5031 Prochordés, c'est à dire, Leptocardiens, Entéropneustes, Tuniciers.

5200-5231 Vertébrés.

Aucune énumération systématique n'est placée sous le numéro 5231.

5400-5431 Poissons [à l'exception des Leptocardiens (ou Amphioxus), qui se trouvent sous les numéros 5000-5031].

Voici les divisions principales :—

Cyclostomes, Ostracodermes, Plagiostomes, Holocéphales, Arthrodires, Dipnoïques, Téléostomes (ou Téléostéens et Ganoïdes, à l'exception des Arthrodires et des Ostracodermes).

La famille doit être mentionnée. Voy. Cambridge Natural History.

5600-5631 Batraciens et Reptiles.

Voici les divisions principales :—

Batraciens ou Amphibies (Stégocéphales ou Labyrinthodontes, Apodes, Caudés ou Urodèles, Ecaudés ou Anoures).

Reptiles (Anomodontes, Rhynchocephales, Plésiosauiens, Ichthyosauriens, Cotylosauriens, Paréiasauriens, Diaptosauriens, Protorosauriens, Rhynchosauriens, Procolophoniens, Proganosauriens, Choristodères, Chéloniens, Crocodiliens, Dinosauriens, Ornithosauriens ou Ptérosauriens, Ophiidiens, Pythonomorphes, Rhiptoglosses, Lacertiliens)

Coleoptera (incl. Strepsiptera).

Il nome della famiglia dev'essere indicato su ciascuna scheda.

Le famiglie sono numerose. Si trovano indicate nel Catalogo dei Coleoptera di Monaco (Catalogus coleopterorum hucusque descriptorum synonymicus et systematicus) e (le susseguenti aggiunte) in "Cambridge Natural History," vol. vi.

Prochordata, cioè Leptocardii, Enteropneusta, Tunicata.

Vertebrata.

Non deve porsi alcuna enumerazione sistematica sotto 5231.

Pisces [escl. Leptocardii (vel Amphioxus), per i quali vedi 5000-5031].

Le divisioni principali sono :—

Cyclostomi, Ostracodermi, Plagiostomi, Holocephali, Arthrodira, Dipnoi, Teleostomi (o Teleostei e Ganoidei, con esclusione di Arthrodira e Ostracodermi).

Indicare la famiglia. Vedi Cambridge Natural History.

Batrachia et Reptilia.

Le divisioni principali sono :—

Batrachia vel Amphibia (Stegocephala vel Labyrinthodentia, Apoda, Caudata vel Urodela, Ecaudata vel Anura).

Reptilia (Anomodontia, Rhynchocephalia, Plesiosauria, Ichthyosauria, Cotylosauria, Pareiasauria, Diaptosauria, Protorosauria, Rhynchosauria, Procolophonina, Proganosauria, Choristodera, Chelonia, Crocodilia, Dinosauria, Ornithosauria vel Pterosauria, Ophidia, Pythonomorpha, Rhiptoglossa, Lacertilia).

5800-5831 Aves.

The principal divisions are :—

Accipitres, Aepyornithes, Alcae, Alektorides (including *Cariama*), Anisodactylæ (including Podargidae and *Steatornis*), Anseres (including Phœnicopteri and Palamediidæ), Apteryges, Casuarii, Cocyges, Columbae, Coraciæ, Crypturi, Cypseli, Dinornithes, Fulicariæ, Gallinæ, Gaviæ, Herodiones, Heterodactylæ, Impennes, Limicolæ, Odontolcæ, Odontormæ, Opisthocomi, Passeres (mention families), Pici, Psittaci, Pterocletes, Pygopodes, Rheæ, Saururæ, Steganopodes, Stereornithes, Striges, Struthiones, Tubinares, Zygodactylæ.

Aves.

Hauptabteilungen sind :—

Accipitres, Aepyornithes, Alcæ, Alektorides (einschl. *Cariama*), Anisodactylæ (einschl. Podargidæ und *Steatornis*), Anseres (einschl. Phœnicopteri und Palamediidæ), Apteryges, Casuarii, Cocyges, Columbae, Coraciæ, Crypturi, Cypseli, Dinornithes, Fulicariæ, Gallinæ, Gaviæ, Herodiones, Heterodactylæ, Impennes, Limicolæ, Odontolcæ, Odontormæ, Opisthocomi, Passeres (Familien angeben), Pici, Psittaci, Pterocletes, Pygopodes, Rheæ, Saururæ, Steganopodes, Stereornithes, Striges, Struthiones, Tubinares, Zygodactylæ.

6000-6031 Mammalia.

The principal divisions are :—

Carnivora, Cetacea, Chiroptera, Edentata, Insectivora, Marsupialia, Monotremata, Multituberculata, Primates, Rodentia, Sirenia, Tillodontia, Ungulata (Artiodactyla, Perissodactyla, Subungulata).

Mammalia.

Hauptabteilungen sind :—

Carnivora, Cetacea, Chiroptera, Edentata, Insectivora, Marsupialia, Monotremata, Multituberculata, Primates, Rodentia, Sirenia, Tillodontia, Ungulata (Artiodactyla, Perissodactyla, Subungulata).

5803-5831 Oiseaux.

Voici les divisions principales :—

Accipitres, *Æpyornithéens*,
 Alciens, Alectorien (y compris les
Cariama), Anisodactyles (y compris
 les Podargides et les *Steatornis*),
 Ansériens (y compris les Phœnico-
 ptères et les Palamédiidés), Aptery-
 giens, Casuariens, Cœcygiens,
 Colombins, Coraciens, Crypturiens,
 Cypseliens, Dinornithiens, Fuli-
 cariens, Gallinacés, Gaviens,
 Hérodiens, Hétérodactyles, Im-
 pennes, Limicoliens, Odontolciens,
 Odontormiens, Opisthocomes, Pas-
 sereaux (indiquer les familles),
 Pics, Perroquets, Ptérocliens,
 Pygopodes, Rhéens, Saururiens,
 Stéganopodes, Stérconithiens, Stri-
 giens, Struthioniens, Tubinariens,
 Zygodactyles.

6000-6031 Mammifères.

Voici les divisions principales :—

Carnivores, Cétacés, Chiroptères,
 Édentés, Insectivores, Marsupiaux,
 Monotrèmes; Multituberculés, Pri-
 mates, Rongeurs, Siréniens, Tillo-
 dontes, Ongulés [Ungulata] (Artio-
 dactyles, Périssodactyles, Subon-
 gulés).

Aves.

Le divisioni principali sono :—

Accipitres, *Æpyornithes*, Alcæ,
 Alectorides (incl. *Cariama*), Aniso-
 dactylæ (incl. Podargidæ et
Steatornis), Anseres (incl. Phœni-
 copteri et Palamediidæ), Apteryges,
 Casuarii, Cœcyges, Columbæ,
 Coraciæ, Crypturi, Cypseli, Dinor-
 nithes, Fulicariæ, Gallinæ, Gaviæ,
 Herodiones, Heterodactylæ, Im-
 pennes, Limicolæ, Odontolcæ,
 Odontormæ, Opisthocomi, Passeres
 (indicare le famiglie), Pici, Psit-
 taci, Pterocletes, Pygopodes,
 Rheæ, Saururæ, Steganopodes,
 Stereornithes, Striges, Struthiones,
 Tubinares, Zygodactylæ.

Mammalia.

Le divisioni principali sono :—

Carnivora, Cetacea, Chiroptera,
 Edentata, Insectivora, Marsupialia,
 Monotremata, Multituberculata, Pri-
 mates, Rodentia, Sirenia, Tillo-
 dontia, Ungulata (Artiodactyla,
 Perissodactyla, Subungulata).

I. COMPREHENSIVE ZOOLOGY

ARRANGED BY

D. SHARP

This section includes works that deal with more than one branch of Zoology, or that are of general interest to Zoologists. It is, therefore, not complete in itself as regards any one subject included in it. The special records complete each subject. A few memoirs included in the special records are repeated in this division.

In *Solea monochir*; *Trypanosoma dohrni* sp. n.; in *Syngnathus acus*; *T. sp. n.* (Russ.); **Yakimoff, 518.**

Amphibia.

New Haematozoa from Amphibia and Reptiles, morphological notes; **França, 175.**

Haemogregarines of Amphibia (*Rana* spp.), Tonkin; **Mathis & Léger, 311 & 312.**—Trypanosomes from Amphibia and Reptiles, Tonkin; **Mathis & Léger, 311.**

Trypanosomes of frogs and toads, Tonkin; in *Bufo melanostictus*, *T. chattoni* n. sp.; **Mathis & Léger, 310.**—In *B. m.* (Tonkin), *Tryp. bocagei* var. n. *parva* and *magna*; **Mathis & Léger, 307.**

In Axolotl, intestine, *Rhizomastix gracilis* n. g., n. sp.; **Alexeieff, 12.**

In *Bufo regularis* (Portuguese Guinea), *Hg. pestanae* n. sp., *Tryp. bocagei* n. sp., and *Toddia bufonis* n. g., n. sp.; **França, 175.**—In *B. regularis* (Khartoum), various Protozoa; **Steven-son, 448.**

In *Bufo vulgaris* and *calamita*, *Trichomonas angusta*, in *Triton marmoratus* and *cristatus*, *T. tritonis*, in *Haemopsis sanguisuga*, *T. sanguisugae*, n. spp.; **Alexeieff, 10.**

In *Triton* spp., *Salamandra* and *Discoglossus*, cysts regarded as of Flagellate nature (either *Bodo* or *Trichomonas*) and not vegetable; **Alexeieff, 13.**

In *Triton taeniatus*, intestine, *Poly-mastix batrachorum* n. sp.; **Alexeieff, 12.**

Reptilia.

Hémogregarines de Reptiles et des Batraciens du Tonkin; **Mathis & Léger, 312.**

In *Boa imperator*, *Haemogregarina imperatoris* [n. sp.]; **Seidelin, 421.**

In a viper (*Cerastes cornutus*), *Haemogregarina seurati* n. sp.; **Laveran & Pettit, 274.**

Haemogregarines of Chelonia (*Ocadia sinensis* and *Trionyx cartilagineus*), of Ophidia (*Bungarus fasciatus* and *Hypsirhina chinensis*); **Mathis & Léger, 312.**

The crocodile is the Vertebrate host of *Trypanosoma grayi*; **Kleine & Taute, 246.**

In *Lacerta* sp., blood-plasma, amoeboid and irregular, perhaps flagellate bodies [possibly contamination with, or unusual presence of, intestinal parasites]; **Seidelin, 421.**

In *Mabuia perroteti*, *Tryp. perroteti* n. sp.; **França, 175.**

In a tortoise (*Sternotherus derbianus*), Portuguese Guinea, *Haemogregarina sternothei* n. sp.; **França, 195.**—In *Varanus niloticus* (Portuguese Guinea), *H.* sp.; **id. 175.**

In *Testudo graeca*, *Balantidium testudinis* [n. sp. ?]; **Chagas, 89.**

Aves.

In various birds, *Leucocytozoon zie-manni* [and probably other spp.]; **Cardamatis, 72.**

In various birds, Tonkin, *Halteridium* spp. indet.; **Mathis & Léger, 311.**

In various birds, Tonkin, *Leucocytozoon* spp., including *L. kerandeli* from

Francolinus sinensis and *dubreuilii* from thrush, n. spp.; **Mathis & Léger, 311.**

In various birds, Tonkin, Trypanosomes with new species; **Mathis & Léger, 306 & 311.**

In various Japanese birds, intracellular blood-parasites (*Halteridium*, *Leucocytozoon* and *Proteosoma*) and Trypanosomes; **Ogawa, 349.**

In various birds (Brazil), mononuclear leucocytes, new Haemogregarines; **Aragao, 20.**

Trypanosomes of the trumpeter horn-bill (*Bycanistes buccinator*); **Dutton, Todd & Tobey, 143.**

In domestic fowl, caecum, *Trichomonas gallinarum*, *Trichomastix gallinarum* and *Chilomastix gallinarum*, n. spp.; **Martin & Robertson, 303.**

Trypanosomen in Hühnern (u. a. *Tr. numidae* sp. n.); **Haan, 206.**

In a "laughing jackass" (*Dacelo gigas*), *Halteridium* sp.; **Welsh & Priestley, 492.**

In an eagle (*Haliaetus vocifer*), French Congo, *Leucocytozoon audieri* n. sp.; **Laveran & Nattan-Larrier, 273.**

In peacock, *Ardetta sinensis*, and *Munia topela*, Tonkin, new species of *Leucocytozoon*; **Mathis & Léger, 306.**

In *Lanius excubitor* (butcher-bird) and goldfinch, Trypanosomes, spp. indet.; **Cardamatis, 74.**

Leucocytozoon des oiseaux (*Nycticorax* n., *Centropus senegalensis*) du Congo français; **Aubert & Heckenroth, 22.**

In partridge and marsh-bird, Trypanosomes; **Plimmer, 369.**

Occurrence of *Halteridium* in a sparrow (*Passer domesticus*), apparently the first observation of this parasite in Swiss birds; **Galli-Valerio, 187.**

In *Syrnium aluco*, *Halteridium syrnii* n. sp.; **Mayer, 314.**

Mammalia.

Blutprotozoen bei Säugetieren (Holländisch); **Vrijburg, 481.**

In blood of various animals (chiefly Marsupials), the bodies known as *Anaplasma marginale*; possibly not

parasitic Protozoa at all; **Gilruth, Sweet & Dodd, 190.**

II.—SUBJECT INDEX.

GENERAL. 1003

1. Historical.

History of names *Clypeaster*, *Echinanthus*, *Echinarachnius*, *Echinocyamus*, *Echinodiscus*, *Echinoneus*; **Clark, H. L., 51:** of genus *Cidaris*; **Lambert & Thiéry, 150.**

Genera proposed by Brandt; **Lambert & Thiéry, 151.**

2. General Treatise.

Pošta, 191.

3. Bibliography.

Of Echinoids generally; **Lambert & Thiéry, 153:** of genera of *Diadematae*; **Lambert & Thiéry, 152:** of N. American tertiary Echinoids; **Stefanini, 219.**

Of Asteroidea; **Fisher, 81.**

Of Australian crinoids; **Clark, A. H., 38.**

5. Museums.

Hastings Museum, Echinodermata; **Butterfield, 27.**

1. General.

Of Echinoderma generally; **Bather, 9.**

Of Holothurians; **Becher, 14:** of *Cucumaria japonica*; **Ōshima, 186.**

Comparative anatomy of Recent and Cretaceous Irregular Echinoids; **Klinghardt, 127.**

2. Symmetries.

Of Crinoids; **Clark, A. H., 43.**

5. Skeletal Anatomy.

Of *Echinoneus*; **Westergren, 244:** of *Micraster*, *Hemipneustes*, *Ananchytes* and *Conulus* compared with recent forms; **Klinghardt, 127:** of *Euryalae*; **Döderlein, 69:** of *Marsupites*; **Clark, A. H., 49.**

Ambulacra and phyllodes of fossil Echinoidea; **Hawkins, 105:** Amb. in *Echinoconus*; **Loescher, 158.**

Apical system of Clypeastroids; **Tornquist, 230:** in Echinoids, comp. with calyx in Crinoids; **Mortensen, 182.**

Radioles of Spatangids; **Hornbold, 112:** of Holecypoida, as indicated by tuberculation; **Hawkins, 106.**

Tuberculation of interambulacra of Holoctypoida; **Hawkins, 106.**

Pedicellariae in *Goniasteridae*; **Fisher, 81.**

Arm ossicles in recent crinoids; **Clark, A. H., 41**: Brachials in *Hybocystis*; **Springer, 214.**

Calyx, arms and stem in Pelmatozoa; **Kirk, 126.**

Magnesium carbonate percentage in *Metacrinus* and *Helicometra*; **Clark, A. H., 47.**

6. Hydrocoel, etc.

In *Echinarachnius*; **Gregory, 96**: in *Echinonæus*; **Westergren, 244.**

Traces of circumoral ring and ambulacral ampullae in Irregular Chalk Echinoids; **Klinghardt, 127.**

Podia of Spatangids; **Hornyold, 112.**

Relations of Madreporite to stone canal and Axial Sinus in *Solaster*; **Gemmell, 89.**

7. Other body cavities.

Perihaemal sinuses in *Solaster*; **Gemmell, 89.**

8. Digestive system.

Teeth and Buccal plates in *Conulus*; **Hawkins, 104**: Lantern, etc., of post-larval *Echinonæus*; **Westergren, 244**: Mouth-structure of Spatangids; **Hornyold, 112.**

Rudimentary auricles in *Anachytes*; traces of gut in Irregular Chalk Echinoids; **Klinghardt, 127.**

Characters of anus in *Solaster*; **Gemmell, 89.**

9. Nervous system.

Of Crinoids; **Clark, A. H., 43.**

11. Axial organ.

Axial canals in *Pentacrinidae*; **Clark, A. H., 40.**

12. Generative organs, etc.

Gonads of *Echinocardium*; **Caullery, 29**: Traces of gonads in upper Chalk Irregular Echinoids; **Klinghardt, 127.**

Hermaphrodite Seesterne; **Buchner, 25**: Egg-ducts in *Solaster*; **Gemmell, 89.**

PHYSIOLOGY. 1011

3. Respiration.

Respiratory podia in Spatangids; **Hornyold, 112.**

Oxidation of ova; **Warburg, 242 & 243.**

4. Alimentation, etc.

Une levure trouvée dans le contenu intestinal de l'holothurie; **Sartory et Clerc, 200.**

Methods of feeding of Irregular Echinoids; **Hawkins, 105.**

6. Sensation.

Sensory function of podia in Irregular Echinoids; **Hawkins, 105**: **Hornyold, 112.**

7. Experimental Physiology.

Rearing of *Echinus* hybrid; **Gardiner, 86.**

Influence of heat and cold on movements of *Asterias*; **Matisse, 173.**

Réactions des Comatules; **Bohn, 20.**

Effect of Suprarenal preparations on *Arbacia*; **Douglass, 70**: of Cyanide of Potassium on *Asterias*; **Drzewina, 73**: **Drzewina & Bohn, 74**: of glandular extracts of Starfish on blood pressure; **Gautrelet, 87**: des ferments protéolytiques; **Sellier, 207.**

Einfluss hypertotonischer Lösungen auf befruchtete Echinideneier; **Konopacki, 135.**

Atmung der *Strongylocentrotus* in reinen Chlornatriumlösungen; **Meyerhof, 176.**

DEVELOPMENT. 1015

2. General accounts.

Of *Chiridota*; **Clark, H. L., 50.**

Reproduction by fission in *Astroceras* and *Ophiocrasis*; **Clark, H. L., 52.**

3. Formation of Gonads.

Verhalten des Mittelstückes des Echinidenspermiums bei der Befruchtung; **Meves, 175.**

Ova and Spermatozoa of Echinoderms; **Retzius, 194 & 194a**: **Schaxel, 202.**

Origin of polar and bilateral structure of Echinoid egg; **Jenkinson**, 122.

Fascia vitellogena in oocyte of *Antedon*; **Cotronei**, 60.

Plasmastruktur der Holothurioidea; **Schaxel**, 203.

Peculiar chromosome developments in *Toxopneustes*; **Heffner**, 107: Heterochromosome of male origin in ech.; **Tennent**, 225.

Ueber hermaphrodite Seesterne; **Buchner**, 25.

Biochemistry of ova of *Echinus*; **Moore**, 179.

4. Oviposition, etc.

Fécondation de *Paracentrotus*; **Dantan**, 64: of Ech. generally; **Schaxel**, 202.

Eindringen des Schwanzfadens bei der Befruchtung von Seeigeleiern; **Witschi**, 245.

Distruzione dei prodotti sessuali maschili; **Martiis**, 172: Verhalten des sogenannten Mittelstückes des Echinidenspermiums bei der Befruchtung; **Meves**, 174.

Hermaphroditismus des *Asterina*; **Drz**, 72.

Natural hybrids of Echini; **Mortensen**, 182.

Chromosomes of *Hipponoe* and *Moir*; **Pinney**, 190.

5. Larval stages.

Plutei, etc., of Ech. in Plankton; **Hensen**, 108: **Mielck**, 177: **Steuer**, 223: of Ophiurids, Asteroids and Echinoids off Scilly Isles; **Browne** & **Vallentin**, 24.

Abnormal larva of *Holothuria ferdosa*; **Arts**, 5: *Auricularia* from Japan; **Ōshima**, 187.

Pluteus—skeleton in *Strongylocentrotus*; **Moore**, 178: Comparison of normal and hybrid larvae of *Echinus*; **Shearer**, **De Morgan** & **Fuchs**, 208.

Pentacrinoid larvae of *Hathrometra*; **Mortensen**, 181.

6. Organogeny.

Bildung selbständiger Skeletelemente und das Problem der Gestaltbildung in einheitlichen Protoplasmamassen; **Becher**, 13: erste Organbildung der Ech.; **Schaxel**, 202.

Growth of suranal plate in Echinoids; **Mortensen**, 182.

Development of stem and anal plate in *Antedon*, and of *Pentremites*, and coronal plates of Echinoids illustrate recapitulation; **Cummings**, 62: Theoretical ontogeny of *Uintacrinus*; **Kirk**, 126.

7. Post-larval growth stages.

Development of test in *Abatus cavernosus*; **Mortensen**, 180: in *Echinonæus*; **Westergren**, 244.

Petit exemplaire de *Conulus subconicus*; **Valette**, 233.

Characters of young hybrid *Echinus*; **Shearer**, **De Morgan** & **Fuchs**, 208.

Change from 6 to 5 arms in ontogeny of *Astroceras* and *Ophiocrasis*; **Clark**, H. L., 52.

8. Experimental Embryology.

Rearing of *Echinus miliaris*; **MacBride**, 164: Respiration of ova; **Warburg**, 242.

Cytotropische Vereinigung unbefruchteter Seeigeleier (Russ.); **Eismond**, 75.

Effect of hypertonic solutions on fertilization in Echinoids; **Konopacki**, 134 & 135: **Lillie**, 155: Isotonic solutions of neutral salts on unfertilized echinoderm eggs; **Lillie**, 156.

Catalase of echinoderm eggs before and after fertilization; **Lyon**, 162.

Phosphorus metabolism during early cleavage of echinoderm egg; **Shackell**, 201.

Permeability of eggs of *Arbacia*; **Lyon** & **Shackell**, 163: **McClendon**, 166 & 167: of *Toxopneustes*; **Harvey**, 103: Permeabilität des Seeigeleies für Farbstoffe; **Runnström**, 198.

Prevention of toxic action in fertilized ovum of *Arbacia*; **Loeb**, 157.

Reifung des Seesterneies bei experimenteller Parthenogenese; **Buchner**, 26: Artificial Parthenogenesis in *Strongylocentrotus*; **Hindle**, 110.

Development of isolated pieces of the gastrulae of *Strongylocentrotus*; **Jenkinson, 121.**

Hybridization of Echinoids; **Shearer, De Morgan & Fuchs, 208**: of *Echinus miliaris* and *E. acutus*; **Fuchs, 84**: of *E. miliaris* and *E. esculentus*; **Gardiner, 86**: of *Echinus* and *Echino-cardium*; **MacBride, 165.**

Kombination der heterogenen Befruchtung mit der künstlichen Parthenogenese; Antagonismus der Einwirkung des Spermas von verschiedenen Tierklassen; **Godlewski, 93.**

ETHOLOGY. 1019

1. General accounts.

Of Sea Urchins; **Bather, 10**: of Palaeozoic and Mesozoic Echinoids; **Tornquist, 230.**

Of Stelleroids; **Bather, 11**: of *Amphiuira*; **Arts, 4.**

Of Pelmatozoa; **Kirk, 126.**

2. Special habits.

Rock boring by *Strongylocentrotus*; **Romanes, 197.**

Effects of light and contact with solid walls on behavior of ophiuroids; **Cowles, 61.**

Eleutherozoic habits among Pelmatozoa; **Kirk, 126.**

3. Habitat.

Of Sea-urchins and Starfish; **Süssbach & Breckner, 224**: of Pelmatozoa; **Kirk, 126.**

Of Greenland Echinoderms; **Mortensen, 181**: Bathymetric and temperature ranges of N. Pacific Ophiuroids; **Clark, H. L., 52.**

Burial in sand of Spatangids; **Horn-yold, 112.**

4. Feeding.

Feeding Habits of Spatangids; **Horn-yold, 112**: of Crinoidea; **Kirk, 126.**

Influence of feeding habits on evolution of Echinoids; **Douvillé, 71**: **Hawkins, 105.**

(N-9186 m)

5. Defence and Protection.

Variation in degree of calcification during life of Ophiurids; **Clark, H. L., 52.**

Colouring of *Strongylocentrotus*; **Awerinzew, 7.**

6. Locomotion.

Lantern of Aristotle used in locomotion; **Gemmell, 88.**

7. Autotomy and Regeneration.

Autotomy in holothurians; **Pearse, 188**: of stem in Crinoidea; **Kirk, 126.**

Regeneration of arms in *Amphio-plus*; **Clark, H. L., 52**: of entire *Linckia* from single arm; **Fisher, 81**: of *Linckia* and other Ech.; **Korscheldt & Heider, 136.**

8. Parasites and Commensals.

Nematodes parasitic in gut of *Auricularia*; **Ōshima, 187**: Gregarines in *Chirodota*; **Sokolow, 213.**

Echinophyces mirabilis parasitic in *Eurocidaris perrieri*; **Koehler, 132**: Crab in apex of *Toxocidaris*; **Thiéry, 229.**

Dendrogaster in *Poraniopsis*; **Fisher, 81.**

Raumparasitismus einer Ophiure in einer Schnecke; **Simroth, 211.**

Myzostomids in stems of fossil Crinoids; **Jahn, 120**: *Loxosomella* on *Hathrometra proluxa*; **Mortensen, 184.**

9. Protection of young.

In *Henricia*; **Fisher, 81.**

Marsupial pouches in *Abatus* and *Pseudabatus*; **Koehler, 131.**

10. Sexual Dimorphism.

Differences in apical system in *Acrosaster*; **Lambert, 141.**

Proportionate numbers of sexes in Crinoids; **Kirk, 126.**

11. Relation to other animals.

Economic aspect of Sea Urchins; **Bather, 10**: of Starfish; **Bather, 11.**

Trepang in Philippine Islands; **Seale, 206.**

12. In Geological aspect.

Palaeozoic iron-minerals indicating former crinoidal limestone; **Cayeux, 30.**

13. Phaenology.

Of Echin. larvae in Plankton; **Mielcke, 177.**

VARIATION AND AETIOLOGY.

1023

1. Variation in form.

In *Echinoconus*; **Loescher, 158**: in *Echinonæus*; **Westergren, 244.**

3. Variation, meristic, numerical.

Variation in number of arms in *Amphiodia*, *Ophiacantha*, *Ophiactis*, *Ophiologinus* and *Ophiopholis*; **Clark, H. L., 52**: in *Asterina*, *Linckia*, *Pteraster*, *Solaster*; **Fisher, 81.**

Six-rayed *Antedon costatus*; **Leuthardt, 154.**

5. Variation, teratological.

In apex of *Toxocidaris* due to presence of parasitic crab; **Thiéry, 229.**

Abnormal freedom of *Carabocrinus*; **Kirk, 126.**

7. Variation, mutational.

Über die Grösse der Variabilität und ihre biologische Bedeutung; **Peter, 189.**

Variation in skeleton of *plutei* of *Strongylocentrotus*; **Moore, 178.**

8. Evolution, general.

Eleutherozoic habit marks degeneration in Cystidea but progress in Crinoidea; **Kirk, 126.**

Evolution of Echinoids; **Douvillé, 71**: of Palaeozoic and Mesozoic Echinoids; **Tornquist, 230.**

10. Evolution, phylogenetic.

Of Echinoderma; **Bather, 9.**

Of Holothurians; **Becher, 14**: of Holothurians, Echinoids and many families of Crinoids; **Kirk, 126.**

Genealogical table of *Scutellidae*; **Stefanini, 218**: of *Peribrissus*, *Agas-*

sizia and *Echinolampas*; **Stefanini, 220.**

Pentremites descended from *Codaster*; **Cummings, 62.**

Of phylloide structure; **Hawkins, 105**: of Tuberculation of Irregular Echinoids; **Hawkins, 106.**

Of nervous system and symmetry of crinoids; **Clark, A. H., 43.**

DISTRIBUTION.

1027

A. GEOGRAPHICAL.

i. General.

Of Echinoidea; **Mortensen, 180**: of *Scutellidae*; **Stefanini, 218.**

Of Echinoderm larvae in plankton; **Théel, 227.**

ii. Atlantic Ocean, etc.

North Sea, Scarborough, *Echinus*, *Solaster*; **Irving, 117**: **Woods, 246**: Scilly Isles, Larval and adult Echinoderms [List]; **Browne & Vallentin, 24.**

Migration of *Arbacia* into Mediterranean; **Stefanini, 221.**

Mauritania, Echinoderms; **Koehler, 133**: Côte occidentale d'Afrique, Echinoderms; **Koehler, 128**: **Vaney, 234**: African recent Crinoids; **Clark, A. H., 48.**

Philippine Islands, Holothurians; **Seale, 206**: Asteroids; **Fisher, 79**: Unstalked crinoids; **Clark, A. H., 39**: *Comaster*; **Clark, A. H., 42.**

West Indies, *Echinonæus*; **Westergren, 244**: Havana, *Blakiaster*; **Fisher, 82.**

iii. Indian Ocean, etc.

Cyclometra gen. n.; **Clark, A. H., 44.**

Zanzibar, spp. n. in *Heterometra*; **Clark, A. H., 45**: E. African recent Crinoids; **Clark, A. H., 48.**

Kerguelen Islands, Asteroidea, Ophiuroidea; **Koehler, 129**: Mergui Archipelago, Burma, Ophiuroidea; **McIntosh, 168.**

Aru-Inseln, Echinoidea; **Döderlein, 68**: Seychelles, *Pelagothuria*; **Simpson, 210.**

iv. Pacific Ocean, etc.

Victoria, *Trochodota*; **Allan, 1**: S.W. Australia, Crinoidea; **Clark, A. H., 38.**

New Caledonia, sp. n. in *Oligometra*; **Clark, A. H., 45.**

East Indies, *Echinocyamus*; **Westergren, 244**: *Thalassocrinus*; **Clark, 46**: Hawaiian Islands, *Hyalinothrix*; **Fisher, 78.**

Japan, *Auricularia*; **Ōshima, 187**: Holothurioidea; **Augustin, 6**: Euryalae; **Döderlein, 69**: *Astroclon*; **Mortensen, 183.**

North Pacific, Asteroidea; **Fisher, 81**: Ophiuroidea; **Clark, H. L., 52.**

v. Arctic Ocean, etc.

Nord- und Ostsee, *Echinus*, *Culcita*; **Süssbach & Breckner, 224**: Kola fjörd, Ech. (general); **Derjugin, 65.**

Greenland, Ech. (general); **Grieg, 100**: N.E. Greenland, Ech. of Danmark-Ekspedition; **Mortensen, 181.**

Holothurians and Asteroids of "Fram" Expedition; **Grieg, 98**: Duc d'Orléans, Campagne de 1907; **Grieg, 99.**

vi. Antarctic Ocean, etc.

Kermadec Islands, Stellerids and Echinids; **Benham, 16**: Christmas Island, *Comissia* sp. n.; **Clark, A. H., 37.**

South Australia, *Asterodiscus* sp. nov.; **Coleman, 55**: New Zealand, *Goniodon*, *Pentaceros*; **Koehler, 130.**

British Antarctic Expedition; **Koehler, 131**: Pourquoi-Pas? Expedition; **Koehler, 132**: Swedish Antarctic Expedition, and Tierra del Fuego, Echinoids; **Mortensen, 180.**

B. GEOLOGICAL.

i. General.

Evidence of former geography based on distrib. of Tertiary Echinoids; **Stefanini, 222.**

ii. Cainozoic.

a. General.

Distribution of *Scutellidae*; **Stefanini, 218**; North American Tertiary Echinoids; **Stefanini, 219.**

b. Pleistocene.

Brabant, Derived Jurassic fossils as pebbles; **Tesch, 226.**

Taubenbank, Golfe von Neapel, Holothurians, Echinoids, Asteroids, Ophiurids, Echinoids; **Walther, 240.**

c. Pliocene.

Bassin du Rhône, Plaisancien, Echinoidea; **Lambert, 146.**

Isola di Citera, *Clypeaster*, *Echinolampas*; **Nelli, 185.**

Panama canal, *Encope* sp. n.; **Toula, 231.**

Victoria, Batesford Limestone, Echinoidea, Asteroidea, Crinoidea; **Chapman, 31.**

d. Miocene.

Touraine, *Brissus*, *Phymatopagus*; **Lambert, 140**: Bassin du Rhône, Helvétien, Echinoidea; **Lambert, 146.**

Sardinia, *Clypeaster*, *Echinolampas*; **Lovisato, 159 & 160**: Friuli, *Brissopsis*, *Mariania*, *Schizaster*; **Stefanini, 217.**

Coalinga district, California, Vaqueros, Jacalitos and Etchegoin, *Astrolopsis*, *Echinarachnius*, *Scutella*; **Arnold & Anderson, 3.**

f. Eocene.

Paris, Echinoidea; **Lambert, 143.**

Biarritz, Echinoids; **Castex, 28**: Priabonian Colli Berici, Crinoidea, Echinoidea; **Fabiani, 76**: Cati (Alicante), *Prenaster*; **Jiménez de Cisneros, 123.**

Bahna, Roumania, Echinoidea; **Macovei, 169**: Grola in Cornedo [in basic tuff], Echinoidea; **Dal Lago, 63.**

Cyrenaica, n. spp. in *Amphiope*, *Schizaster* and *Sarsella*; **Gregory, 97**: Egypt, Echinoidea; **Hume, 116**: Senegal, *Oligopygus* sp. n.; **Lambert, 138.**

Miike Coalfield, Japan, *Pentacrinus*; **Yokoyama, 247.**

Seymour, Isle, Antarctic, *Cassidulus*, *Schizaster*; **Lambert, 147.**

iii. Mesozoic.

b. Cretaceous.

1. *Upper Cretaceous.*

Hampshire, *Echinocorys*, *Bourguetincrinus*; Griffith & Brydone, 102: Hunstanton, *Cidaris*, *Holaster*, *Salenia*, *Pentacrinus*; Jackson, 118: Keston, Kent, *Uintacrinus*; Dibley, 67.

Chartres, Upper Chalk, *Uintacrinus*; Fillozat, 77: Cotentin, calc. à Baculites, Echinoidea; Lambert, 142: Haute-Marne, Echinoids; Thiéry, 228: Rennes-Bains et Corbières, Echinides; Lambert, 145: Yonne, Echinoidea; Valette, 233.

Sicily, *Hemiaster*; De Stefano, 66.

Aragon, Cénomanien et Sénonien, Echinides; Lambert, 144.

Böhmen, Cenoman, Echinoidea, Crinoidea; Frič, 83: Saxony, Chalk, Echinoidea, Asteroidea; Wanderer, 241: Simbirsk, *mucronata* chalk, n. spp. in *Salenia* and *Goniaster*; Laghusen, 137.

Egypt, Cenomanian-Danian, Echinoidea; Hume, 116: Bordj-Sabath, Algérie, Maëstrichtien, Echinides; Blayac & Cottreau, 18.

Desert Sandstone, Queensland, *Micraster*; Chapman, 33: Gingin, W. Australia, Chalk, *Phyllocanthus*; Glauert, 92.

Seymour Isle, Antarctic; Maëstrichtien and Aturien, *Cyathocidaris*, *Hemiaster*; Lambert, 147.

Peru, Kreide, *Holctypus*; Salfeld, 199.

Mississippi, Tombigee Sandstone, *Marsupites*; Springer, 216.

2. *Lower Cretaceous.*

Hunstanton, Carstone, *Pentacrinus*; Jackson, 118.

Haute-Marne, Aptien, *Salenia*, *Mio-toxaster*; Thiéry, 228.

Seymour Isle, Antarctic; Cénomanien and Vraconien, *Holaster*, *Nordenskjoldaster*; Lambert, 147.

c. Jurassic.

1. *Upper Jurassic.*

Penshurst, Kimmeridge Clay, *Saccocoma*; Bath, 12.

Haute-Marne, Echinoids; Thiéry, 228: Haute Sâone, Oxfordien, Echin., Crin.; Maire & Deecke, 171.

Bei Hannover, Echinoidea; Schöndorf, 204: Lausen, Hornsteinknollen, *Antedon*; Leuthardt, 154: Stramberg, Tithon, *Desorella* sp. n.; Blaschke, 17.

West Australia, Echinoidea and Crinoidea; Glauert, 91.

3. *Lower Jurassic.*

Near Cirencester, Great Oolite and Cornbrash, *Acrosalenia*, *Cidaris*, *Clypeus*, *Echinobrissus*, *Hemicidaris*; Richardson, 195: Near Oxford, Cornbrash, *Acrosalenia*, *Holctypus*, *Pygurus*; Allorge & Bayzand, 2: Bristol, Lower Oolites, Echinoids; Tutchet, 232.

Pelvoux, ? Bajocien, *Pygomalus*; Lambert, 139: Tarascon, Hauterivien, *Alpicidaris*; Saint-Gaultier, Vésulien, *Thierychinus*; Bathonien, *Acrosaster*; Lambert, 141.

Sardegna, Batonian, *Echinobrissus*; Fucini, 85.

Thomar, Aalenian, Echinoidea; Choffat, 35.

d. Lias (including Rhaetic).

Somersetshire, Lower Lias, *Hemipedina*, *Pseudopedina*; Richardson, 196: Keynsham, nr. Bristol, *Pseudodiadema*; Vaughan & Tutchet, 236: Leicestershire, *A. spinatus* zone, *Eodiadema*; Horwood, 113: Glen Parva, Leicestershire, *Ophiolepis*; Horwood, 114.

Haute-Marne, Crinoids; Thiéry, 228.

e. Trias.

Haute-Marne, *Encrinus*; Thiéry, 228.

Germany, Asteroidea; Schoendorf, 205.

Aargauer Tafeljura, Muschelkalk, Crinoidea; Brändlin, 22: Dobrogea, *Cidaris*, *Encrinus*; Simionescu, 209.

iv. Palaeozoic.

b. Permian.

Kansas, Marion Stage, *Archaeocidaris*; Beede, 15.

d. Upper Carboniferous.

Bristol Coal Measures, Crinoid columnals; **Bolton, 21**: Lancashire Middle Coal Measures, *Archaeocidaris*; **Jackson, 119**.

Spitzbergen, Mittelkarbon, *Platycrinus* sp. n.; **Holtedahl, 111**.

Brazil Limestone, *Archaeocidaris*, *Eupachyrcrinus*, *Zeacrinus*; **Greene, 94**.

Oklahoma, Wewoka formation, Crinoidea; **Girty, 90**.

e. Lower Carboniferous.

St. Andrews, Calcareous sandstone (in Volc. agglomerate), Echinoidea and Crinoidea; **Balsillie, 8**: Solway, Echinoidea, Crinoidea; **Smith, 212**: Culm, near Exeter, Crinoid stems; **Collins, 57**.

West Australia, Crinoidea; **Glauert, 91**.

Indiana, Huron group, *Echinocrinus*, Crinoidea, *Pentremites*; **Greene, 95**: Indiana and Kentucky, Knobstone formation, Crinoids; **Springer, 215**.

f. Devonian.

Cornwall, Ophiurids, Crinoids; **Collins, 56**.

Belgian fossil localities, Infra-devonian, Asteroidea, Crinoidea, Cystidea; **Maillieux, 170**.

Steiermark, Grauwackenzone, Crinoidea; **Heritsch, 109**.

NEMATHELMINTHIA.

SUBJECT INDEX.

COMPREHENSIVE AND GENERAL. 1403

Historical.

Historical records of intestinal worms in ancient times; Moulé, 252.

Bibliography.

Jahresbericht über Nematelminthia und Acanthocephala für 1909; Fuhrmann, 105.

Economics.

RELATION TO DISEASE.

Substances toxiques de l'*Ascaris megaloccephala* (pour le cheval); Weinberg et Julien, 391.—Substances toxiques de la Trichine et de ses larves; Romanovitch, 310.

Ascaridi non posseggono tossicità; Guerrini, 141 & 142.

Indian camel filariasis; Leese, 191.

Effects of *Onchocerca gibsoni* on cattle; Leiper, 198.

Oxyuris occurring in the human appendix in cases of appendicitis; Railliet, 296.

Presence of Nematodes (unspec.) in the cutaneous swellings of "Esponja" of horses in Brazil, and their possible causal connection with the disease; **Ferret, Dupuy et Mercier, 84** (1 pl.).

Osservazioni anatomo-patologiche riguardanti una nuova specie di *Spiroptera* (*S. perforans*) del pollo; **Centoscudi, 37**.

Larvæ of *Strongyloides intestinalis* in human lung; **Gage, 108**.—Einiges über die Lungenwurmseuche (*Strongylidae*); **Sallač, 321**.

Les cerfs de la forêt de Chantilly sont décimés par les Helminthes (*Strongylidae*); **Brumpt, 34**.

Strongylus (*Sclerostoma*) *pinguicola* and pigs; **Hellemans, 154a**.

La strongylose gastro-intestinale et l'oesophagostomose larvaire jouent un rôle prépondérant dans l'étiologie de la "cachexie aqueuse" des ruminants; l'helminthiase nodulaire du boeuf est rapporté à l'oesophagostomose (*Oes. columbianum*); **Cuillé, Marotel et Panisset, 59**.

Pathological condition of the liver of a hare due to Nematode eggs (cf. *Trichosoma*); **Nicoll, 267**.

Trichodes crassicauda specifica, eine Causa directa in der Aetiologie der Tumoren; **Löwenstein, 217**.

Die Aphelenchen der Veilchengallen und der Blatfflecken an Farnen und *Chrysanthemum*; **Schwartz, 330**.

METHOD OF INFECTION.

Mode of infection of *Cyclops* with the *Filaria medinensis*; manner of entry and exit of the worm; **Leiper, 192**.

Untersuchungen über den Infektionsweg bei *Strongyloides* und *Ankylostomum*; **Fülleborn & Schilling, 103b**.

Filaria medinensis: suo modo di penetrazione nell' organismo umano; **Coppola, 57**.

Anguillula intestinalis: penetrazione delle sue larve attraverso la cute; **Marzocchi, 226**.

Technique.

Methode zur Anzeichnung von Ankylostomenlarven zwecks Thierinfektion; **Fülleborn, 103a**.

(N-9186 o)

Technique for fixing and preserving Nematodes; **Leiper, 194**.

STRUCTURE. 1407

General.

NEMATODA.

Description of male and female *Filaria loa*; **Huffman & Wherry, 163**.

Beiträge zur Morphologie der *Filaria bancrofti*, **Cobbold; Hida, 156a**.

Account of anatomy and embryo of *Onchocerca gibsoni*; **Leiper, 198**.

Struktur der Süßwasser-Mermithiden; **Daday, 61 & 62**.

Morphology of *Spiroptera strongylina* Rud.; **Ciurea, 46a**.

Account of *Strongylus pinguicola* (*Sclerostoma pinguicola* Verrill, *Stephanurus dentatus* Diesing); **Hellemans, 154a**.

Trichinella spiralis, anatomy; **Frothingham, 102**.

Muscular System.

Fibres musculaires d'*Ascaris*. 1.
Fibres pariétales; **de Baillon, 12**.

Nervous System.

Système nerveux de l'*Ascaris* d'après des travaux récents (revue critique); **de Rouville, 319**.

PHYSIOLOGY. 1411

Production of Sex.

Ueber die Geschlechtschromosomen bei einigen Nematoden nebst Bemerkungen über die Bedeutung dieser Chromosomen; **Gulick, 143**.

Das Verhalten des Chromatins bei *Angiostomum* (*Rhabdonema*) *nigrovenosum*. Ein Beitrag zur Kenntnis der Beziehungen zwischen Chromatin und Geschlechtsbestimmung; **Schleip, 325**.

Environmental Effects.

Durch Radiumbestrahlung hervorgerufene Veränderungen in den Kernteilungsfiguren der Eier von *Ascaris megalocephala*; **Hertwig, 156**.

Kompressionsversuche am befruchteten Ei von *Ascaris megalocephala*; **Girgolaß, 120**.

Résistance au froid des embryons des Strongylidés intestinaux; **Galli-Valerio, 109a.**

REPRODUCTION. 1415

Development; Life-History.

Anguillula intestinalis nella *Rana*: sua origine; **Altieri, 1.**

Metamorphosis of *Filaria* in the body of the mosquito (*Culex pipiens*); **Lebrede, 189.**

Development of *Trichostrongylus pergracilis*; **Leiper, 204.**

Spermatogenesis, Oogenesis, etc.

Ueber die Geschlechtschromosomen bei einigen Nematoden nebst Bemerkungen über die Bedeutung dieser Chromosomen; **Gulick, 143.**

Das Verhalten des Chromatins bei *Angiostomum (Rhabdonema) nigrovenosum*; **Schleip, 325.**

Chromosomenverhältnisse in den Spermatiden bei dem Nematoden *Ancyracanthus cystidicola*; **Mulsow, 254.**

The sex-chromosomes in *Ascaris felis*; **Edwards, 78.**

La réduction plasmatique dans la spermatogénèse de l'*Ascaris megalocephala*; **Romieu, 311.**—La spermio-génèse chez l'*Ascaris megalocephala*; **Romieu, 312.**

Über die Beteiligung der Plasto-chondrien an der Befruchtung des Eies von *Ascaris megalocephala*; **Meves, 234.**

Über Auftreten und Teilungen abnorm grosser zweiter Richtungskörper bei *Ascaris megalocephala bivalens*; **Kautzsch, 175.**

Ueber das Verhalten der Geschlechtschromosomen bei Hermaphroditismus. Beobachtungen an *Rhabditis nigrorenosa*; **Boveri, 28.**

Experimental Embryology.

Kompressionsversuche am befruchteten Ei von *Ascaris megalocephala*; **Girgolaß, 120.**

Larval Forms.

Larval forms of *Filaria loa*, taken from a living female, identical with *F. diurna*; **Huffman, 162.**

Une larve de Spiroptère parasite des Coléoptères ioprophages et des Reptiles; **Seurat, 340.**

ETHOLOGY. 1419

Bionomics.

Bionomics of *Trichostrongylus pergracilis*; **Leiper, 204.**

Biological factors and Nematode (hookworm) infections in tobacco haciendas, Philippine Islands; **Willets, 396.**

Parasitism.

ETHOLOGY. 2019

Parasitism.

A Fungus (*Palaeachlya*) parasitic on the Cambrian *Lingula lewisii*; **Chapman, 5.**

DISTRIBUTION. 2027

(α) RECENT.

Bermuda, sp. n. *Argyrotheca*; **Dall, 9.**

Arctic, occ. *Rhynchonella psittacea*, *Waldheimia cranium*; **Dautzenberg & Fischer, 10.**

Antarctic, spp. n. *Magellania*; **Smith, 51.**

Antarctic, spp. descr. and fig.; **Eichler, 16.**

United States (Wisconsin), spp. n. *liassina*, *Lingula*, *Liorhynchus*, *Camaracchia*, *Atrypa*, *Orbiculoidea*, *Stroperidonta*, *Pentamerella*; Cleland, 7a.

United States (Missouri), occ. *Syringothyris occidentalis* in Middle Devonian; Schuchert, 50.

United States (Virginia), occ. *Tropidoleptus carinatus* in Chemung fauna; Kindle, 33.

Chitral, Persia, Afghanistan and Himalayas; var. n. *Spirifer*; Reed, 46.

Japan, occ. *Spirifer verneuili*; Yabe, 65.

Carboniferous.

England, spp. n. *Meekella*, *Orthotetes*, *Derbyia*, *Schellwienella* (gen. n.); Thomas, 56.

Wales (Glamorgan), sp. n. *Spirifer*; Dixon & Vaughan, 14.

Scotland (Solway), occ. *Productus hemisphericus*; Smith, 52.

Germany (Hagen i. W.); Nebe, 42.

Bohemia, Bellerophonkalkes; Diener, 13.

Spitzbergen, *Productus isachseni* sp. n.; Høltedahl, 30.

United States (Illinois and Missouri), spp. n. *Camarophoria*, *Camarotechia*, *Rhynchopora*; Weller, 62.

United States (Ohio), Maxville Limestone spp. described and figured; Morse, 40.

United States (Missouri), sp. n. *Dielsmoides* (gen. n.); Weller, 63.

United States (Arkansas, Moorefield Shale), spp. n. *Lingula*, *Liorhynchus*, *Productus*, *Rhipidomella*, *Spirifer*; Girty, 24.

Magdalen Is., spp. n. *Hemiptychina*, *Lingula*, *Orbiculoidea*, *Productus*, *Pugnax*, *Strophalosia*; Beede, 2.

Permian.

Oberes Palaeozoicum von Djulfa, *Brachiopoda*; Stoganow, 54.

Trias.

Spain (Aragonien), sp. n. *Lingula*; Warm, 64.

Italy (Valseca), spp. n. *Waldheimia*; Tommasi, 57.

Jurassic.

France (Jura), spp. n. *Rhynchonella*, *Terebratula*, *Zeilleria*; Rollier, 49.

Italy (Acquasparta), spp. n. *Spiriferina*, *Rhynchonella*; Principi, 44.

Italy (Belluno), spp. n. *Waldheimia*; De Toni, 12.

Switzerland (Aarau), sp. n. *Zeilleria*; Rollier, 49.

Austria-Hungary (Stramberg-in-Mähren), lists, sp. n. *Rhynchonella*; Blaschke, 3.

Hungary (Kronstadt), var. n. *Terebratula*; Toulà, 58.

Russia (Litauer), sp. n. *Waldheimia*; Boden, 4.

Brachiopoda der Inseln Preobraženje und Begičev (Russ.); Sokolov, 53.

Donez-Jura, spp. n. *Terebratula*, *Rhynchonella*; Nalivkin, 41.

British Columbia, sp. n. *Terebratula*; Clapp & Shimer, 7.

Switzerland, spp. n. *Rhynchonella*; Hahn, 28.

Cretaceous.

Deutsch Ostafrika, sp. n. *Terebratula*; Krenkel, 34.

Bohemia, cenomanian lists and figures; Frič, 21.

Hungary (Kronstadt), occ. *Rhynchonella Multicarinata* and *Terebratula peregrina* in Chalk; Toulà, 59.

Denmark (Faxø), spp. n. *Crania*, *Terebratula*, *Argiope*, *Thecidium*; Nielsen, 43.

Tertiary.

Japan (Koshiba), spp. n. *Terebratulina*; Yokoyama, 67.

Japan (Miike Coal-field), sp. n. *Terebratula miikensis*; Yokoyama, 66.

United States (Alabama), Eocene sp. n. *Argyrotheca*; Aldrich, 1.

II.—SUBJECT INDEX.

GENERAL. 2003

Bibliography.

Bryozoa für 1909. [Jahresbericht]; Lucas, 26.

Expeditions.

H.M.C.S. "Miner" in Tasman Sea; Maplestone, 28.

"Jacques-Cartier" expedition in 1908; Guérin-Ganivet, 19.

"Princesse-Alice" collections; Calvet, 12.

STRUCTURE. 2007

Bau der Individuen und Kolonien von *Plumatella repens*; Braem, 7.

Flustra carbasea, etc., enigmatic body in; Palk, 31.

DEVELOPMENT. 2015

Membranipora larva; Die *Cyphonautes* der nordischen Meere; Lohmann, 25.

Fortpflanzungsweisen von *Plumatella repens* und *Victorella continentalis*; Braem, 7

Larvae of *Bugula* and *Cephalodiscus* compared; **Braem, 8.**

Vegetative reproduction in *Bryozoa*; **Korschelt & Heider, 23.**

ETHOLOGY. 2019

Die *Cyphonautes* der nordischen Meere; *C. barroisi* sp. n.; **Lohmann, 25.**

Kolonienbildung bei *Plumatella repens*; **Braem, 7.**

Loxosoma sp. on *Xanthias haswelli* from Christmas Island; **Calman, 10.**

Parasites von *Plumatella repens*; **Braem, 7.**

Symbiose von *Plumatella repens* mit *Paludina*; **Braem, 7.**

Ueberwinterung von *Plumatella repens*; **Braem, 7.**

VARIATION AND AETIOLOGY. 2023

Die Variation bei den Statoblasten von *Pectinatella magnifica*; **Braem, 6.**

Pterobranchier und Bryozoen; **Braem, 8.**

DISTRIBUTION. 2027

(a) RECENT.

(a) Marine.

Greenland, sp. n. *Loxosomella* (gen. n.); **Mortensen, 29.**

Scotland, *Barentsia benedeni*; **Ritchie, 33.**

Ireland, *Brettia pellucida* var. n. *gracilis*; **Nichols, 30.**

Azores, spp. n. *Crisia*, *Reptotubigera*, *Entalophora*, *Hornera*, *Concavea* (gen. n.); **Calvet, 12.**

Arctic (Europe), *Retepora elongata* var. n. *watersi*; **Guérin-Ganivet, 19.**

Tasman Sea, sp. n. *Selenaria*; **Maplestone, 28.**

(b) Non-Marine.

England (Norfolk); **Brydone, 9.**

Germany (Tegeler See), occ. *Pectinatella magnifica*; **Köhler, 22.**

Turkestan (Issyk Kul See), sp. n. *Victorella*; **Braem, 7.**

British India, var. n. *Histopia*; **Annandale, 1.**

(b) FOSSIL.

Palaeozoic.

United States (Wisconsin); **Teller, 34.**

Cambrian.

Russia (Esthonia), sp. n. *Heteronema*; **Bassler, 5.**

Ordovician.

Russia (Baltic), sp. n. *Corynotrypa* (gen. n.); **Bassler, 3.**

Baltic Provinces, 66 spp. n., 2 gen. n.; **Bassler, 5.**

United States (Minnesota), sp. n. *Homotrypella*, var. n. *Ceramoporella*; **Bassler, 15.**

United States and Canada, spp. n. *Corynotrypa* (gen. n.); **Bassler, 4.**

Devonian.

Italy (Monumenz), spp. n. *Fenestella*; **Gortani, 18.**

Canada (Ontario), sp. n. *Corynotrypa* (gen. n.); **Bassler, 3.**

United States (Wisconsin), spp. n. *Heteronema*, *Vinella*, *Orbignyella*; **Bassler, 4.**

Carboniferous.

Arkansas, Moorefield Shale, sp. n. *Batostomella*; **Girty, 17.**

Trias.

Hungary (Bakony), spp. n. *Ceriopora*, *Fascicularia*; **Vinassa de Regny, 35;** spp. n. *Ceriopora*, *Stomatopora*; **Papp, 32.**

Cretaceous.

England (Chalk), sp. n. *Pavonulites*, nom. n. *Lunulites*; **Brydone, 9.**

France (Royan), List Chalk spp.; **Canu, 15.**

Bohemia, cenomanian lists and figures; **Frič, 16.**

Argentina, Rocanéan de Roca, 61 spp. n. 3 genn. n.; **Canu, 13.**

Tertiary.

Italy (Vicentin); **Kranz, 24.**

Australia (Victoria), spp. n. *Catenicella*, *Strophipora*, *Claviporella*, *Vittaticella*, *Brettia*, *Caberea*, *Farcimia*, *Menipea*, *Synaptacella* (gen. n.), *Cellularia*, *Membranipora*, *Steganoporella*, *Thalamoporella*, *Aspidostoma*, *Phylactella*, *Inversiula*; **Maplestone, 27.**

S.W. France, Burdigalian and Helvetian, spp. n. *Cellaria*, *Hippoporina*, *Lagenipora*, *Lunulites*, *Membranipora*, *Monopora*, *Onychocella*, *Schizoporella*; **Canu, 14.**

Antarctic (Cockburn Island), Pleistocene, sp. n. *Adeonella*; **Hennig, 20.**
